This is a practical, modern introductory grammar for classroom and self-instruction. Unlike Alan Gardiner’s monumental Egyptian Grammar , this is not intended as a reference work, and it is designed to be as user-friendly as possible by, for example, presenting simplified forms of genuine texts rather than diving straight into the originals. It is suggested the the 16 lessons be spread over about 30 weeks study. The book is widely used in North American courses.

This sign list is designed as a accompaniment to James Hoch’s Middle Egyptian Grammar, a practical course for students of the Ancient Egyptian language.

The Egyptian Glyphary is part of Museum Tours’ series “ The Essentials ” ... books that anyone serious about the study of Egyptology will find useful. This unique Egyptian language dictionary is called a Glyphary to distinguish it from dictionaries that list entries in strictly alphabetical order. Rather, it lists words based on the hieroglyphic signs that they contain, resulting in easier word look-up. One can find a word without knowing its beginning letter or its transliteration. A word can often be found even if part of the word is missing or unreadable. It has been created to fill a need for a low cost, yet comprehensive, translation aid to hieroglyphs that is convenient to use. Its emphasis is on words found in monumental inscriptions, as opposed to words found strictly in papyri. The words it contains are most likely to be encountered on the monuments in Egypt or in museums. It contains a total of about 8,000 total entries, of which about 4,000 are unique. This compares favorably to the 2,500 entries in the vocabulary of Alan Gardiner’s “Egyptian Grammar”, and the 5,000 plus entries in Raymond Faulkner’s “Dictionary of Middle Egyptian”. The volume’s convenient size makes it ideal for everyday use anywhere one happens to be, a local museum or the monuments in Egypt. It is a “must have” for any serious student, Egyptologist or Egyptophile.From Museum Tours Press.

Middle Egyptian introduces the reader to the writing system of ancient Egypt and the language of hieroglyphic texts. It contains twenty-six lessons, exercises (with answers), a list of hieroglyphic signs, and a dictionary. It also includes a series of twenty-five essays on the most important aspects of ancient Egyptian history, society, religion and literature. The combination of grammar lessons and cultural essays allows users to not only read hieroglyphic texts but also to understand them, providing readers with the foundation to understand texts on monuments and to read great works of ancient Egyptian literature in the original text. This second edition contains revised exercises and essays, providing an up-to-date account of current research and discoveries. New illustrations enhance discussions and examples. These additions combine with the previous edition to create a complete grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields.

This book offers a comprehensive, self-contained introduction to one of the oldest known recorded languages—Hieroglyphic Egyptian. Unlike other approaches, it is geared toward learning to read one of the masterpieces of Middle Egyptian literature, the story “ Shipwrecked Sailor, ” written around 2200 bce. The text ’ s eighteen lessons— organized around such topics as the body, flora, fauna, titles, administration, religion, sexuality, and warfare—cover all the basic grammar and syntax of Middle Egyptian. The book includes exercises for each chapter, sign lists, Egyptian/English and English/Egyptian dictionaries defining all the words and phrases used in the lessons, and a new edition of the tale “ Shipwrecked Sailor ” with facing commentary. Although the overall approach is literary, Hieroglyphic Egyptian can also be used as an introduction to reading other material, such as biographical inscriptions, religious texts, historical annals, and mathematical or medical papyri. The text is suitable for classroom use, as well as for those who want to learn independently.

The Hieroglyphic Sign List is part of Museum Tours’ series “ The Essentials ” ... books that anyone serious about the study of Egyptology will find useful. This paperback version of the Hieroglyphic Sign List was developed as an outgrowth of Museum Tours’ popular, pocket-sized Sign List book. By increasing its size we were able to overcome most of the limitations of the smaller book. It is not just a larger version of the spiral bound book. It has been completely re-edited and updated. Definitions have been expanded. Sign descriptions have been added. More relevant examples have been included. Words have been spelled out in glyphs as well as in transliteration. In order to maintain ease of use, the order and the numbering generally follow the sign list in Gardiner’s Egyptian Grammar. From Museum Tours Press.

This is a data-oriented grammatical description of Middle Egyptian, a now extinct Pharaonic language, spoken and written in the hieroglyphic and hieratic scripts, between 2100 and 1700 before our era, the period of the Middle Kingdom. Middle Egyptian was regarded by the Egyptians as a classical stage of their language and it remained in use for a long time after that period. Middle Egyptian texts are extremely varied and comprise stories, historical narratives, letters, scientific treatises, and a large number of religious sources. The first volume is a systematic description of the language, illustrated by a great number of quotations from original texts, and provided with word lists and other indexes. The second volume leads the reader in a gradual way in 33 lessons through the grammatical description provided in the first volume, and moreover contains an extensive list of hieroglyphic signs and their values, exercises and, finally, original texts for reading.

Grammar lessons and cultural essays allows users not only to read hieroglyphic texts but also to understand them, providing the foundation for understanding texts on monuments and reading great works of ancient Egyptian literature. This third edition is revised and reorganized, particularly in its approach to the verbal system, based on recent advances in understanding the language. Illustrations enhance the discussions, and an index of references has been added. These changes and additions provide a complete and up-to-date grammatical description of the classical language of ancient Egypt for specialists in linguistics and other fields.
