One of the most popular therapies for anxiety is Cognitive Behavioural Therapy and this serves as an influence for this workbook. While CBT is complex and has many aspects to it, one key tenet is that it may help an anxious person to pinpoint unhelpful beliefs and behaviours and replace them with more objective facts and observations. While this workbook is not intended to provide any kind of clinical or diagnostic support it will be a very helpful addition to a guided journal for people who are dealing with anxiety. Writing down prompts grounded in cognitive behavioural therapy to help identify the causes of your anxiety for long-term peace of mind. You will soon identify your triggers and deal with daily situations a lot better.

The truth is that you can defeat your fears. With more than forty simple, effective techniques, you’ll learn how to overcome every conceivable kind of anxiety without medication. Are you plagued by fears, phobias, or panic attacks? Do you toss and turn at night with a knot in your stomach, worrying about your job, your family, work, your health, or relationships? Do you suffer from crippling shyness, obsessive doubts, or feelings of insecurity? What you may not realize is that these fears are almost never based on reality. When you’re anxious, you’re actually fooling yourself, telling yourself things that simply aren’t true. See if you can recognize yourself in any of these distortions: All-or-Nothing Thinking: “My mind will go blank when I give my presentation at work, and everyone will think I’m an idiot.” Fortune Telling: “I just know I’ll freeze up and blow it when I take my test.” Mind Reading: “Everyone at this party can see how nervous I am.” Magnification: “Flying is so dangerous. I think this plane is going to crash!” Should Statements: “I shouldn’t be so anxious and insecure. Other people don’t feel this way.” Emotional Reasoning: “I feel like I’m on the verge of cracking up!” Self-Blame: “What’s wrong with me? I’m such a loser!” Mental Filter: “Why can’t I get anything done? My life seems like one long procrastination.” Now imagine what it would feel like to live a life that’s free of worries and self-doubt; to go to sleep at night feeling peaceful and relaxed; to overcome your shyness and have fun with other people; to give dynamic presentations without worrying yourself sick ahead of time; to enjoy greater creativity, productivity and self-confidence. With these forty techniques, you’ll be able to put the lie to the distorted thoughts that plague you and your fears will immediately disappear. Dr. Burns also shares the latest research on the drugs commonly prescribed for anxiety and depression and explains why they may sometimes do more harm than good. This is not pop psychology but proven, fast-acting techniques that have been shown to be more effective than medications. When Panic Attacks is an indispensable handbook for anyone who’s worried sick and sick of worrying.
