The 1984-1985 Miners' Strike Miners Strike 1984 85 Loss

150–200. Charged. 8.392. The miners' strike of 1984-85 was a major industrial action to shut down the British coal industry in an attempt to prevent colliery closures. It was led by Arthur Scargill of the National Union of Mineworkers (NUM) against the National Coal Board (NCB), a government agency.

UK miners' strike (1984–85) - Wikipedia

Nevertheless, 'The Miners' Strike, 1984-85: Loss Without Limit' is a great read for anyone with a serious interest in the topic. I came away having learned a great deal, and I can honestly say I enjoyed the experience. What more can one want from a book?

Miners' Strike, 1984-85: Loss without Limit: Amazon.co.uk ...

Read any book on the '84-'85 Miners' Strike and this one is invariably in the bibliography, cited throughout, and even here and there referred to as the 'definitive' account; and yet it seems to have slipped under Amazon's radar. Weird. Anyway, 'Loss Without Limit' is undoubtedly an excellent book. 300-odd pages of in-depth analysis and discussion of that fateful year, it was published in 1986 and takes great pride in the number and variety of people who were interviewed to fill its pages.

Thirty-five years after it ended, the year-long 1984/85 miners' strike still casts a long shadow over communities across the country. By Ian Swanson Monday, 2nd November 2020, 4:45 pm

Miners' strike: Pardon represents some justice for people ...

Strike84. In 1984 I spent 12 months photographing the Miners' Strike in the UK. The dispute started when the Conservative government, led by Margaret Thatcher, announced the closure of Cortonwood Colliery in Yorkshire. This was to be the first of 20 pit closures with the loss of 20,000 jobs. The National Union of Mineworkers (NUM) responded by calling for a national strike.

Strike84 – Strike84

"The miners' strike of 1984-85 was a time of great disruption and hardship in mining communities and indeed across all of Scotland. Policing has always been of and from our communities. During the miners' strike, though many officers demonstrated compassion and commitment to public service in challenging circumstances, injustices arose.

Pardon for miners convicted during strike

Miners convicted of certain offences relating to the strike in 1984-85 will be pardoned in order to aid reconciliation within the affected communities, Justice Secretary Humza Yousaf has announced.

Scotland to pardon hundreds convicted in 1984/85 miners ...

The Miners' Strike of 1984-1985 was an attempt by miners to stop the National Coal Board (NCB) and the government of Prime Minister Margaret Thatcher shutting down collieries (mines). By the early 1980s the collieries were losing money. The government announced on 6 March 1984 that 20 collieries would close, meaning that many mining communities would lose their main source of employment.

The Miners' Strike 1984-85 • Police, Protests and Public ...

The fuse for the strike was lit on March 1st 1984 with the announcement by the Coal Board that Cortonwood colliery in Yorkshire would close in 5 weeks. The well-known policy of the NUM was that they would only accept pit closure in cases where the coal was exhausted, and the Yorkshire NUM area council announced on March 5th that its 58,000 members would strike following the last shift on Friday, March 9th.

Miners' Strike 1984-85: Loss without Limit: Amazon.co.uk ...

This book, first published in 1986, examines the miners' strike of 1984-5 – an event that formed the decisive break with a forty-year-old British tradition of political and industrial compromise. The stakes for the main parties were so high that the price each was willing to pay, the loss each was willing to sustain, exceeded anything seen in an industrial dispute in half a century. This book examines and assesses the strike's full implications, and puts it into its historical and political context.

Miners' Strike 1984-85: Loss without Limit: Amazon.co.uk ...

The rise and fall of Britain's most important industry No one personified the age of industry more than the miners. The Shadow of the Mine tells the story of King Coal in its heyday - and what happened to mining communities after the last pits closed. Coal was central to the British economy, powering its factories and railways. It carried political weight, too. In the eighties the miners risked everything in a year-long strike against Thatcher's shutdowns. Defeat foretold the death of their industry. Tens of thousands were cast onto the labour market with a minimum amount of advice and support. Yet British politics all of a sudden revolves around the coalfield constituencies that lent their votes to Boris Johnson's Conservatives in 2019. Even in the Welsh Valleys, where the 'red wall' still stands, support for the Labour Party has halved in a generation. Huw Beynon and Ray Hudson draw on decades of research to chronicle these momentous changes through the words of the people who lived through them.

A controversial new investigation in the 1984 Miners strike and how it changed Modern Britain. The Miners' strike was a dividing line in Modern British history. Before 1984, Britain was an industrial nation, reborn from the ashes of the Second World War by Clement Atlee's vision of a welfare state. Most of the great industries were nationalised and the trade unions was one of the major forces in the land. After the strike, which ended with humiliating defeat in March 1985, Thatcher's Britain was born. In March 1984, the leader of the Miners' Union, Arthur Scargill, led his members out of the pits without a ballot to protest at planned pit closures; they would spend the next 13 months facing the utmost deprivations as they fought to keep their jobs. On picket lines the miners faced harassment and the police, which culminated in the violent Battle of Orgreave. Meanwhile Thatcher's government feared that Britain was on the verge of a civil war. It was a struggle of attrition that neither side could dare lose. Twenty five years after the strike, the debate is still controversial. Marching to the Faultline tells the full story of the strike from confidential cabinet meetings at Downing Street to backroom negotiations, and life on the picket line. The book draws on previously unseen sources from interviews with the major figures, private archives and documents obtained under the Freedom of Information Act to set the record straight.

John Lowe, chairman of Clipstone Colliery's strike committee, was at the forefront of the fight for jobs of the twelve months' 1984/85 miners' strike at a time when most Nottinghamshire miners preferred to work. The now well-known 'dirty war' fought by the Thatcher Government against the National Union of Mineworkers transformed him from a passive family man into a political animal. Lowe was witness to many disturbing events, recording his experiences and thoughts in a diary so that they would never be forgotten: read about a pensioner friend beaten at a police roadblock, a bleak but unifying Christmas, the slow trickle back to work, and finally the dreaded day the strike ended - and the first harrowing weeks back at the coal face among people he despised. With the scars of the dispute still fresh, John Lowe reflected upon both local and national events to produce pieces of writing from the heart, illustrated via a huge collection of documentation and memorabilia. Although a tale of sorrow it is also a testament to the unquenchable spirit of men and women fighting for a just cause during the most significant industrial dispute in modern history.

This book analyses the 1984-5 miners' strike by focusing on its vital Scottish dimensions, especially the role of workplace politics and community mobilisation. The year-long strike began in Scotland, with workers defending the moral economy of the coalfields, and resisting pit closures and management attacks on trade unionism. The book relates the strike to an analysis of changing coalfield community and industrial structures from the 1960s to the 1980s. It challenges the stereotyped view that the strike began in March 1984 as a confrontation between Arthur Scargill, the miners' leader, and Margaret Thatcher's Conservative government. Before this point, in fact, 50 per cent of Scottish miners were already on strike or engaged in a significant pit-level dispute with their managers, who were far more confrontational than their counterparts in England and Wales. The book explores the key features of the strike that followed in Scotland: the unusual industrial politics; the strong initial pattern of general solidarity; and then the emergence of varieties of pit-level commitment. These were shaped by differential access to community-level moral and material resources, including the economic and cultural role of women, and pre-strike pit-level economic performance. Against the trend elsewhere, notably in the English Midlands, relatively good performance prior to 1984 was a positive factor in building strike endurance in Scotland. The book shows that the outcome of the strike was also distinctive in Scotland, with an unusually high level of victimisation of activists, and the acceleration of deindustrialisation consolidating support for devolution, contributing to the establishment of the Scottish Parliament in 1999.

Miners' Strike 1984-85: Loss without Limit: Amazon.co.uk ...

John Lowe was at the forefront of the fight for jobs during the twelve months of the miners strike from 1984-5 as the elected chairman of Clipstone Collierys strike committee in the largely working county of Nottinghamshire. The dirty war fought by the Thatcher Government to defeat the formidable National Union of Mineworkers transformed him from passive family man into political animal: witness to many disturbing events, he recorded his experiences in a diary so they would never be forgotten. There is the initial confusion and scramble to organise; the London rally which the police sought to turn into a riot; his arrest and fast-tracking through the court system; the legendary pensioner friend Sid beaten black and blue at a police roadblock; unifying events such as Christmas, the slow trickle back to work; and finally, the dreaded day the strike ended and first harrowing weeks back at the coalface among people he despised. With the scars left by the dispute still fresh upon him, he reflected upon events both at local and national level. If Spirit Alone Won Battles interweaves his diaries and this reflection is illustrated by an exhaustive collection of photographs, correspondence, court documents and campaign literature.It is a tale of heartbreak; but also a testament to the unquenchable spirit and stomach to fight of men and women with a just cause.

Miners' Strike 1984-85: Loss without Limit: Amazon.co.uk ...

While electorally weak, the Communist Party of Great Britain and its Welsh Committee was a constant feature of twentieth century Welsh politics, in particular through its influence in the trade union movement. Based on original archival research, the present volume offers the first in-depth study of the Communist Party's attitude to devolution in Wales, to Welsh nationhood and Welsh identity, as well as examining the party's relationship with the Labour Party, Plaid Cymru and the labour and nationalist movements in relation to these issues. Placing the party's engagement of these issues within the context of the rapid changes in twentieth century Welsh society, debates on devolution and identity on the British left, the role of nationalism within the communist movement, and the interplay of international and domestic factors, the volume provides new insight into the development of ideas by the political left on devolution and identity in Wales during the twentieth century. It also offers a broad outline of the party's policy in relation to Wales during the twentieth century, and an assessment of the role played by leading figures in the Welsh party in developing its policy on Wales and devolution.
