addiction • Explores the many sacred sites of the Madonnas and connects them to other Great Goddesses, such as Isis, Aphrodite, Cybeles, and the Orisha Yemanja and Ochun •

Includes access to 12 audio tracks

The mysteries of the Black Madonna can be traced to pre-Christian times, to the ancient devotion to Isis, the Earth Goddess, and the African Mother, to the era when God was not only female but also black. Sacred sites of the Black Madonna are still revered in Italy, and, as Alessandra Belloni reveals, the shamanic healing traditions of the Black Madonna are still alive today and just as powerful as they were millennia ago. Sharing her more than 35 years of research and fieldwork at sacred sites around the world, Belloni takes you on a mystical pilgrimage of empowerment,

initiation, and transformation with the Black Madonna. She explains how her love for Italian folk music led her to learn the ancient tammorriata musical tradition of the Earth Goddess Cybele and the Moon Goddess Diana and discover the still-living cult of the Black Madonna in the remote villages of Southern Italy. She vividly describes the sensual shamanic drumming and ecstatic trance dance rituals she experienced there, including the rites of the tammorriata, the transgender rite of Femminielli, and the erotic “ spider dance ” of the tarantella, which has been used for centuries in the Mediterranean for healing. Sharing chants, rhythms, and sacred songs, she details how she uses these therapeutic musical and trance practices to heal women and men from abuse, trauma, depression, and

addiction and shows how these practices can be used for self-healing and transformation, including her personal story of using the tarantella to overcome cervical cancer.

Revealing the profound transformative power of the Black Madonna, Belloni shows how She is the womb of the earth, the dark side of the moon, and the Universal Mother to all. Truly alive for all to call upon, She embraces and gives everyone access to Her divine strength and unconditional love.

Its theoretical and practical foundations have become the working tools of scientists, philosophers, and artists, who seek strategies and policies to accelerate the development process in different contexts.

David Tomasi presents new, groundbreaking research on the science and application of Mind-Body Medicine strategies to improve clinical outcomes in inpatient psychiatry settings. Much more than a list of therapeutic recommendations, this book is a thorough description of how Mind-Body Medicine can be successfully applied, from a

therapeutic as well as from an organizational, cost-effective analysis viewpoint, to the full spectrum of psychiatric treatments. Furthermore, this study examines the role of multidisciplinary and interdisciplinary treatment teams, with a special focus on the profession and the role of psychotherapists and group therapists, thereby providing solid scientific evidence of the benefits of patient-provider therapeutic alliances. In this sense, this book serves as a guide for professionals and institutions both in the private and the public sphere, to learn effective treatment and management strategies.

This book presents an analysis of the correlation between the mind and the body, a complex topic of study and discussion by scientists and

Based on the most recent cutting-edge scientific discoveries on the Mind-Body problem, Tomasi presents a full examination of multiple fields related to neuroscience. The volume offers a scientist-based and student-friendly journey into medicine, psychology, artificial intelligence, embodied cognition, and social, ecological and anthropological models of perception, to discover our truest self.

nature. Viewed more broadly, disorientation is a profoundly geographical theme that concerns our relationship with space, places, the body, emotions, and time, as well as being a powerful and frequently recurring metaphor in art, philosophy, and literature. Using multiple perspectives, lenses, methodological tools, and scales, *Geographies of Disorientation* addresses questions such as: How do we orient ourselves? What are the cognitive and cultural instruments that we use to move through space? Why do we get lost? Two main threads run through the book: getting lost as a practice, explored within a post-phenomenological framework in relation to direct and indirect observation, wayfinding performances, and the various

methods and tools used to find our position in space; and disorientation as a metaphor for the contemporary era, used in a broad range of contexts to express the difficulty of finding points of reference in the world we live in. Drawing on a wide range of literature, *Geographies of Disorientation* is a highly original and intriguing read which will be of interest to scholars of human geography, philosophy, sociology, anthropology, cognitive science, information technology, and the communication sciences.
