This is the first book dedicated to Australian youth gangs, exploring the subtleties and nuances of street life for young men and their quest for social respect. The key focus is on group violence and the ways in which the 'gang' provides a forum for the expression of this violence.

Criminology: Explaining Crime and Its Context, Ninth Edition, is a highly acclaimed textbook offering a broad perspective on criminological theory. It provides students of criminology and sociology with a thorough exposure to a range of theories, contrasting their logic and assumptions, but also highlighting efforts to integrate and blend these frameworks. In this ninth edition, the authors have incorporated new directions that have gained traction in the field, while remaining faithful to their criminological heritage. Among the themes in this work are the relativity of crime (its changing definition) with abundant examples, historical roots of criminology and the lessons they have provided, and the strength and challenges of applying the scientific method. This revision offers enhanced coverage of biosocial theories of crime, more global examples, and a new chapter on youth violence, improving on the most comprehensive and balanced theory text available for undergraduates.

Examines the extent to which black gangsterism is a product of civil rights gains, community transition, black flight, social activism, and failed grassroots social movement groups. The voice of the ghetto was silenced by a black leadership preoccupied with a middle-class integrationist agenda, leading to confusion, frustration, and the emergence of black gangs.

Analysts have long noted that some societies have much higher rates of criminal violence than others. They have also observed that the risk of being a victim or a perpetrator of violent crime varies considerably from one individual to another. In societies with ethnically and racially diverse populations, some ethnic and racial groups have been reported to have higher rates of violent offending and victimization than other groups. This series of essays explores the extent and causes of racial and ethnic differences in violent crime in the United States and several other contemporary societies.

The Handbook on Crime is a comprehensive edited volume that contains analysis and explanation of the nature, extent, patterns and causes of over 40 different forms of crime, in each case drawing attention to key contemporary debates and social and criminal justice responses to them. It also challenges many popular and official conceptions of crime. This book is one of the few criminological texts that takes as its starting point a range of specific types of criminal activity. It addresses not only 'conventional' offences such as shoplifting, burglary, robbery, and vehicle crime, but many other forms of criminal behaviour - often an amalgamation of different legal offences - which attract contemporary media, public and policy concern. These include crimes committed not only by individuals, but by organised criminal groups, corporations and governments. There are chapters on, for example, gang violence, hate crime, elder abuse, animal abuse, cyber crime, identity theft, money-laundering, eco crimes, drug trafficking, human trafficking, genocide, and global terrorism. Many of these topics receive surprisingly little attention in the criminological literature. The Handbook on Crime will be a unique text of lasting value to students, researchers, academics, practitioners, policy makers, journalists and all others involved in understanding and preventing criminal behaviour.
