Have you ever . . . Invested time in something that, in hindsight, just wasn't worth it? Paid too much in an eBay auction? Continued to do something you knew was bad for you? Sold stocks too late, or too early? Taken credit for success, but blamed failure on external circumstances? Backed the wrong horse? These are examples of what the author calls cognitive biases, simple errors all of us make in day-to-day thinking. But by

Dobelli deftly shows that in order to lead happier, more prosperous lives, we don't need extra cunning, new ideas, shiny gadgets, or more frantic hyperactivity—all we need is less irrationality. Simple, clear, and always surprising, this indispensable book will change the way you think and transform your decision making—at work, at home, every day. From why you shouldn't accept a free drink to why you should walk out of a movie you don't like, from why it's so hard to predict the future to why you shouldn't watch the news, *The Art of Thinking Clearly* helps solve the puzzle of human reasoning.

current and emergent business models and strategies luxury companies apply to remain resilient in times of change. It explores a variety of business models answering the following key questions: What is each brand's value proposition used to attract a consumer's willingness to pay? What is each brand's target audience? How do brands navigate and expand their markets? And how do luxury companies organize their resources to design and develop products and services to continually sell to their customers? The answers to these questions provide the foundation of a luxury company's business

strategy and, as a result, its brand architecture. The authors also explore the patterns that have emerged in the ownership, management and the manufacturing in luxury goods companies, where dominance is usually found in certain countries. This book focuses on six key industries in the luxury product sector: fashion, automotive, hospitality, furniture, cosmetics and jewellery. It provides an international perspective with examples drawn from Europe, USA, the Middle East, China and Japan. Through these examples and cases, the authors analyze how luxury companies are facing the challenges posed by

external shocks and an extensive need for digitalization. Using concepts and theories from macroeconomics (such as globalisation) and corporate and business strategy, the book aims to connect the dots between theory and practice. Resilience of Luxury Companies in Times of Change provides perspectives of the past, present and future - how luxury companies have evolved over time and managed to stay resilient despite the challenges they have faced through the different eras.

sustainability - how we imagine better urban environments - remain persistently relevant, and raise recurring questions. How do cities evolve as complex spaces nurturing both urban creativity and the fortuitous art of discovery, and by which mechanisms do they foster imagination and innovation? While past utopias were conceived in terms of an ideal geometry, contemporary exemplary models of urban design seek technological solutions of optimal organisation. The Venice Variations explores Venice as a prototypical city that may hold unique answers to the ancient narrative of utopia. Venice was not the

result of a preconceived ideal but the pragmatic outcome of social and economic networks of communication. Its urban creativity, though, came to represent the quintessential combination of place and institutions of its time. Through a discussion of Venice and two other works owing their inspiration to this city - Italo Calvino's *Invisible Cities* and Le Corbusier's *Venice Hospital* - Sophia Psarra describes Venice as a system that starts to resemble a highly probabilistic 'algorithm', that is, a structure with a small number of rules capable of producing a large number of

variations. The rapidly escalating processes of urban development around our big cities share many of the motivations for survival, shelter and trade that brought Venice into existence. Rather than seeing these places as problems to be solved, we need to understand how urban complexity can evolve, as happened from its unprepossessing origins in the marshes of the Venetian lagoon to the 'model city' that endured a thousand years. This book frees Venice from stereotypical representations, revealing its generative capacity to inform potential other 'Venices' for the future.

Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works "invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism." Mirrors, Galeano's most ambitious project since *Memory of Fire*, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: "Official history has it that Vasco Núñez de Balboa was the first man to see,
