My Best Games: Vs IM Leski In today's game, the Dzindzinator plays a "positional" rook sacrifice (yes, you read that right) for a long term form of compensation against black's uncoordinated pieces and exposed king. The attack climaxes with Roman's two passed central pawns (e and d) rolling up the board to checkmate the black king.

Lasker's Manual of Chess by Emanuel Lasker, Masters of the Chessboard by Richard Réti and Dvoretsky's Endgame Manual by Mark Dvoretsky are three that come to mind. There are of course others, among them My Best Games of Chess, 1908-1937 by the fourth world chess champion, Alexander Alekhine.

The best games of one of the best players in chess history. 220 games with Alekhine's own accounts. Spans 30 years of tournament play.

This is the book that every chess master and grandmaster has read and studied and every aspiring chess master should be reading. The author, a World Chess Champion, clearly explains the most complex and difficult concepts. Grandmaster Reuben Fine wrote that Alekhine's collection of best games was one of the three most beautiful that he knew. World Champion Garry Kasparov wrote, "Alexander Alekhine is the first luminary among the others who are still having the greatest influence on me. I like his universality, his approach to the game, his chess ideas. I am sure that the future belongs to Alekhine chess." Bobby Fischer wrote, "He had great imagination. He could see more deeply into a situation than any other player in chess history. It was in the most complicated positions that Alekhine found his grandest concepts." Chess Journalist Jerry Hanken writes, "The study of this book added 300 points to my rating and made me a master." In 1927, Alekhine became World Chess Champion by defeating Capablanca in a match. He lost the world title to Euwe in 1935 but won it back in 1937. He held the title of World Chess Champion from then until his death in 1946.

For the practical player this volume contains a useful arsenal of little known and deadly ideas. For the armchair enthusiast it is replete with fine specimens of chess board art garnished by the humour of a sharp literary mind. Tartakower was a grandmaster and writer of wit and erudition whose annotations are perennially fresh and provocative. As a player he achieved a string of important first prizes such as London 1927 and Liege 1930 which brought him within a whisker of a world championship challenge against Alekhine.

The Unique Genius of Tartakower! One of the most creative grandmasters ever to play the Royal Game was Savielly Tartakower. His combination of bold play and fascinating writing has long endeared him to chess aficionados worldwide. His classic work of best games has never been available in English algebraic notation. Until now. Tartakower's annotations are unlike any other master of his time. He repeatedly stressed the psychological nature of chess, for example. Another Tartakowerism is: "An attack is against a castled position, weak pawns and, most of all, against the mind of the opponent." What he reserves for a footnote, like what conditions are present to make a game a work of art, other authors would need pages to articulate, if they addressed the matters at all. "This book was meant to do what all great annotations do: instruct, explain, and entertain. And it succeeds spectacularly." Andy Soltis in his Foreword Experience the unique genius of Savielly Tartakower in this 21st Century Edition of his games collection - 201 games, 49 game fragments, all deeply annotated and quintessentially Tartakower!

Vast collection of great chess games from 1798 through 1938, with much hard-to-find material. Fully annotated, arranged by opening for easier study. 150 years of master play!

A collection of the 60 best games of Bobby Fischer, analyzed by himself. The games are reset by John Nunn into modern algebraic notation, providing an insight into the methods and thought processes of one of the greatest chess champions.

This revised and enlarged special anniversary edition for his 80th birthday includes both volumes with his games with white and black. Korchnois annotations are honest, detailed and very instructive.

'Alekhine's games and writings inspired me from an early age...I fell inlove with the rich complexity of his ideas at the chessboard... I hope readers of this book will feel similarly inspired by Alekhine's masterpieces.' From the foreword by Garry Kasparov Alexahnder Alekhine captivated the chess world with his dazzling combatitive play. His genius has been a strong influence on every great player since, none more so than Garry Kasparov. This book contains a selection of the very best of Alekhine's annotation of his own games, converted to algebraic by John Nunn. These games span his career from the early encounters with Lasker, Tarrasch and Rubenstein, through his world title battles, to his meetings with the new generation of players who were to dominate chess in the 1950s.
