A building code is a set of rules that specify the standards for constructed objects such as buildings and nonbuilding structures.

Building code - Wikipedia

Development and publication of the Canadian National Building Code (CNBC) is the responsibility of the Canadian Commission on Building and Fire Codes, part of the National Research Council of Canada or NRC (not to be confused with Natural Resources Canada, or NRCan). The CNBC serves as the code for many federal construction projects.

The NBC sets out technical provisions for the design and construction of new buildings in Canada. It also applies to the alteration, change of use, and demolition of existing buildings. The NBC is available in two volumes and comprises three divisions: A, B and C. Division A includes the compliance options, the objectives, and the functional statements. Division B contains the provisions, referred to as acceptable solutions, relating to such issues as fire protection, occupant safety and accessibility; structural design;

and builders have relied on for years. Now in its fourth edition, this industry standard continues its reputation as a reliable tool for the preliminary selecting, configuring, and sizing of the structural, mechanical, and egress systems of a building. Bestselling authors Edward Allen and Joseph Iano reduce complex engineering and building code information to simple approximations that enable the designer to lay out the fundamental systems of a building in a matter of minutes and get on with the design.
