~~IMO: GMDSS Manual | ELCOME~~

NAVTEX – short for Navigational Telex – is an automated system used to transmit navigational alerts, weather warnings and urgent safety and rescue information. Traditional NAVTEX equipment recorded transmissions as a paper hard copy, but modern NAVTEX receivers use an LCD display and also offer integration with chartplotter and ECDIS systems.

NAVTEX is an international automated direct-printing service for promulgation of navigational and meteorological warnings and other urgent information to ships. It is one of the two principle methods used for broadcasting maritime safety information in accordance with the provisions of the International Convention for the Safety of Life at Sea, 1974, as amended. It has been developed to provide a low-cost, simple and automated means of receiving maritime safety information and Search and Rescue alerts on board ships at sea and in coastal waters. The information transmitted may be relevant to all sizes and types of vessel and the selective message-rejection feature ensures that every mariner can receive safety information broadcasts which are relevant to their voyage. This manual is intended, primarily, for use by

maritime Administrations and others concerned with the preparation and broadcasting of maritime safety information. It will also be of interest to seafarers, shipowners and others who need to receive such information in order to safely go about their business at sea. This fifth edition includes a number of amendments which reflect the recent updates to the Joint IMO/IHO/WMO Manual on Maritime Safety Information. The definitions have been extensively expanded, along with the technical explanations of the "B" characters which make up the alphanumeric code of each NAVTEX message. New sections include examples of navigational warnings and meteorological messages, responsibilities of a NAVTEX Co-ordinator and mutual interference between NAVTEX stations.

The third revision of the International SafetyNET Manual was circulated to IHO Member States, endorsed by COMSAR at its fourteenth session in March 2010 and subsequently approved by the MSC at its eighty-seventh session in May 2010. The amendments will come into force on 1 January 2012.

This volume contains a selection of papers presented at the 13th International Conference on Marina Navigation and Safety of Sea Transport and is addressed to scientists and professionals in order to share their expert knowledge, experience and research results concerning all aspects of navigation, safety of navigation and sea transportation. The Thirteen Edition of the most innovative World conference on maritime transport research is designed to find solutions to challenges in waterborne transport, navigation and shipping, mobility of people and goods with respect to energy, infrastructure, environment, safety and security as well as to economic issues.
