Total Burn Care guides you in providing optimal burn care and maximizing recovery, from resuscitation through reconstruction to rehabilitation! Using an integrated, "team" approach, leading authority David N. Herndon, MD, FACS helps you meet the clinical, physical, psychological, and social needs of every patient. With Total Burn Care, you'll offer effective burn management every step of the way! Effectively manage burn patients from their initial presentation through long-term rehabilitation. Devise successful integrated treatment programs for different groups of patients, such as elderly and pediatric patients. Browse the complete contents of Total Burn Care online and download images, tables, figures, PowerPoint presentations, procedural videos, and more at www.expertconsult.com! Decrease mortality from massive burns by applying the latest advances in resuscitation, infection control, early coverage of the burn, and management of smoke inhalation and injury. Enhance burn patients' reintegration into society through expanded sections on reconstructive surgery (with an emphasis on early reconstruction), rehabilitation, occupational and physical therapy, respiratory therapy, and ventilator management.

The main aim of this book is to evaluate the concept of stress and provide tools for physicians to identify patients who might benefit from stress management. This will incorporate a detailed description of the physiological and pathophysiological consequences of acute and chronic stress that might lead to cardiovascular disease. The book will aim to critically evaluate interventional research (behavioural and other therapies) and provide evidence based recommendations on how to manage stress in the cardiovascular patient. Our intentions are to define and highlight stress as an etiological factor for cardiovascular disease, and to describe an evidence based "tool box" that physicians may use to identify and manage patients in whom stress may be an important contributing factor for their disease and their risk of suffering cardiovascular complications.

Fully revised third edition: Extensive Australian adaptation of a textbook on the fundamentals of nursing based on the USA text by Patricia A Potter and Anne Griffin Perry. Includes 15 new Australian chapters, plus other new and expanded content. Features in each chapter include learning objectives, key concepts and terms, critical thinking exercises, sample nursing care plans, procedural guidelines, research highlights, cultural aspects of care, recording and reporting guidelines, and references. This hardcover volume includes a companion CD-ROM for Windows or Macintosh and an access code for a related website. Includes over 1100 illustrations. Colour design throughout. Indexed.

An Australian text designed to address the key area of clinical reasoning in nursing practice. Using a series of authentic scenarios, Clinical Reasoning guides students through the clinical reasoning process while challenging them to think critically about the nursing care they provide. With scenarios adapted from real clinical situations that occurred in healthcare and community settings, this edition continues to address the core principles for the provision of quality care and the prevention of adverse patient outcomes.

"This Handbook aims to provide both a reference point and practical resource to assist NSW Health staff ... There are many useful resources for clinicians providing care for people experiencing BPSD. This Handbook has been designed using a framework to meet specific requirements with several distinguishing features"--Handbook overview.

"This book is a user-friendly, real-world guide to assessing and managing any type of wound. The author presents vital information for nurses and nursing students who provide wound care in any setting...a wonderful resource for nurses."--The AORN Journal (Association of Perioperative Registered Nurses) "Wound care is arguably the single most difficult topic in medicine. It has no defined solution like insulin for the diabetic...no easy strategy that covers all wounds...we are so tremendously blessed when [a wound care specialist] like Zelia carves out time to capture a career of experiences in text so that it can be shared with others. We are indebted to her for making this important contribution to the clinician's armament for dealing with [the] difficult-to-heal wounds of their patients." Bruce Gibbins, PhD Founder, Chief

Technical Officer and Chairman of the Board of AcryMed, Inc. Former faculty at the University of Otago Medical School Using the concise, compact Fast Facts format, this guide encompasses the multitude of new healing technologies and presents important breakthroughs in understanding why some wounds don't heal. Each chapter builds, step-by-step, on the essential principles of wound care including wound assessment and documentation, the spectrum of wounds from simple to complex, wound treatment guidelines and protocols, and the legal aspects and regulations surrounding wound care. This user-friendly guide organizes the vast amount of information relating to wound care products and eases the complexity of wound management. A "Fast Facts in a Nutshell" section in each chapter provides quick access to important wound care principles, and bullet-point information and tables enable readers to quickly locate relevant information. This guide will be a useful companion in the day-to-day care of wound patients, reinforcing knowledge needed in all practice settings, including acute care, critical care, long-term care, home care, operating room, and outpatient settings. Key Features: Organizes and simplifies a vast amount of wound care information into a compact, user-friendly format Addresses wound care assessment, protocol, and treatment of the spectrum of wounds from simple to complex for all levels of practitioners Encompasses new healing technologies and information regarding difficult-to-heal wounds Presents comprehensive wound care algorithms, dressings, debridement procedures, ostomy care, optimal surface and equipment for wound patients, and adjunctive therapies

"These standards aim to ensure that hospital menus provide the opportunity for patients to select food that satisfies their nutrient requirements and enhances their experience in hospital. "--Foreword.

This new compendium from the AAP Committee on Fetus and Newborn gives you a single place to look for the most recent recommendations on quality care of pregnant women and their newborn infants. This guide features more than 40 policy statements and clinical practice guidelines covering the full spectrum of care from delivery to discharge.
