Nursing Of The Past And Present - 1700 Words | Bartleby

Yep, thats how it works in University of York exams in first year nursing... if you got one wrong answer, they will deduct one point as well... For example, say you out of 10 marks, you got 6 correct answers and 4 wrong answers, they will deduct 4 points off the 6 marks that you've got, meaning you will only have 2 marks overall...so yeah , guessing is not really an option

* The titles in this series provide the student with a collection of new questions and answers in individual subject areas so that the student can concentrate on specific areas of weakness * This new Series of Multiple Choice Questions provides the veterinary nurse student with additional opportunities for both self-assessment and examination practice. * The selected subject areas have been grouped according to the requirements of S/NVQ levels 2 and 3 veterinary nursing examinations, enabling the student to purchase only those books relevant to their year of study. Compiled by a leading training centre, these questions are representative of the type of question likely to appear in the examination paper. By using these revision guides you will not only increase your understanding of the subject but also increase your chances of achieving success in the examination.

The word 'assessment' can strike terror into any student. However, providing evidence of knowledge and skills for professional practice is an integral and essential part of university life as a nursing student. This book helps nursing students better understand the processes of assessment so that every student can achieve their potential in their studies. It looks at each of the major forms of assessment including essays, exams, portfolios, presentations, OSCEs and practice assessments. It specifically addresses the needs of nursing students on new degree courses and therefore gives a clear insight on how to succeed as a student nurse.

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.
