The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test

questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

With eleven new contributions, this second edition of essays on the sources and principles of Dominican values in education offers an extended sample of the many settings in which Dominican education, broadly understood, finds expression. Cherished by all Dominicans, these values are exemplified not only in the lives of well-known foundational Dominicans, but also in some of those many others who, on every continent and across time, have responded in typically Dominican ways at key moments in history. Educators, activists, philosophers, teachers, preachers, artists, healers and theologians at many levels share their analyses and reflections on educating in many different contexts, explicitly and implicitly demonstrating ideals and values common to the goals of Dominican education everywhere. It is hoped that this collection, offered again in this decade of Dominican Jubilee--1206-1216 to 2006- 2016--will inform, inspire and encourage all those engaged in the great work of educating not only youth but people of all ages towards greater life and liberty.

Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy provides readers with a rich collection of research-informed ideas for integrating mobile technologies into learning and teaching. Each chapter looks critically at the issues, related benefits and limitations of learning ubiquitously within the context of the research reported. New and emerging technologies present challenges for education causing educators to have to rethink pedagogy, boundaries and curriculum if they continue to embrace mobile technologies in their teaching.

AIMING FOR THE STARS is a memoir of Dr Sphumelele Ndlovu and his life of hardship, which led him to becoming a Scientist. His mother sold chickens to provide for her children, never considering himself worse off than others. The family was poor. Sphumelele's life was also derailed when strikes caused 24 out of the 28 teachers at his school to abandon their posts in his matric year. Education was Ndlovu's ticket to a better future, and he knew at a young age, that he wasn't going to give it up without a fight. Ndlovu's PhD placed him to be part of a team of scientists set out to measure the distance between the Earth and Moon using lasers. It is the sixth-ever such venture, but the first to be carried out by an African team. A man whose horizon was once confined to the perimeter of a chicken coop now handled tools that allowed his eyes to glide over galaxies.
