Khurana is the start and end of ophthalmology for undergraduates- concise, precise- best for exams and also viva- it is an indispensable book with respect to learning answers- maybe it lacks the explanation needed to understand but if you had to stick to one book- its this! 618 views View 4 Upvoters - Answer requested by

Comprehensive Ophthalmology is the latest edition of this extensive guide to ophthalmology, which includes a free supplementary copy of Review of Ophthalmology. The main text has been thoroughly revised and updated, reorganised into six sections for ease of reference. These sections cover anatomy and physiology of the eye, optics and refraction, diseases of the eye, ocular therapeutics, systemic and community ophthalmology, and practical ophthalmology. The book is divided into 26 chapters, each beginning with a brief overview of the topic followed by relevant anatomy and physiology. The supplementary book Review of Ophthalmology is also thoroughly revised and updated with recent advances, new concepts and principles of investigation, treatment, and surgical procedures developed since the previous edition. The second half of the book provides multiple choice questions corresponding to each of the twenty review chapters. With over 600 full colour images and illustrations and the opportunity for self-assessment in the additional review book, Comprehensive Ophthalmology is an ideal resource for undergraduates, residents and practising ophthalmologists. Key Points Fully revised and updated edition of this comprehensive guide to ophthalmology Previous edition published 2014 (9781848290723) Reorganised into six sections for ease of reference 611 full colour images and illustrations Includes supplementary book: Review of Ophthalmology, with MCGs

The fifth edition of this outstanding textbook has been thoroughly revised and updated without changing the basic structure and organization. New features to this edition comprise – • Corneal dystrophies have been described as per the new IC3D (2008) classification • New dry eye classification and management as per the DEWS (Dry Eye Workshop) recommendations • Recent advances in cataract surgery with newer designs and models of intraocular lenses • Completely changed primary angle-closure glaucoma text as per the newer concepts and guidelines by the Association of International Glaucoma Societies (AIGS) • Addition of Optical Coherence Tomography (OCT) with description of common macular disorders • Addition of anti-VEGF agents and intraocular irrigating solutions among ocular therapeutics • Comprehensive coverage and update on community ophthalmology>About the Author: Contents: Section I : Anatomy, Physiology and Diseases of the Eye • Anatomy and Development of the Eye • Physiology of Eye and Vision • Optics and Refraction • Diseases of the Conjunctiva • Diseases of the Cornea • Diseases of the Sclera • Diseases of the Uveal Tract • Diseases of the Lens • Glaucoma • Diseases of the Vitreous • Diseases of the Retina • Neuro-ophthalmology • Disorders of Ocular Motility • Diseases of the Eyelids • Diseases of the Lacrimal Apparatus • Diseases of the Orbit • Ocular Injuries • Ocular Therapeutics, Lasers and Cryotherapy in Ophthalmology • Systemic Ophthalmology • Community OphthalmologySection II : Practical Ophthalmology • Clinical Methods in Ophthalmology • Clinical Ophthalmic Cases • Darkroom Procedures • Ophthalmic Instruments and Operative Ophthalmology.

This volume provides a complete integration of various fundamental methods of clinical evaluation coupled with sophisticated hi-tech investigative techniques for diagnosis of ophthalmic disorders.The text material is up-to-date and includes recent advances in ophthalmic investigations.
