Oracle iSupplier Portal Implementation Guide

Oracle iSupplier Portal enables suppliers to request changes to purchase orders when modifications are needed to fulfill an order. Suppliers can request changes during or after purchase order acknowledgement. In some cases, a supplier can only partially ship the quantity of goods ordered for a given date.

The only implementation prerequisite for Oracle iSupplier Portal is that Oracle Purchasing has been licensed and fully implemented. For using isupplier one needs to have the access to the following responsibilities. Oracle iSupplier Portal is shipped with the following seeded responsibilities: The Process flow.

## iSupplier Portal Setup | OracleUG

Oracle iSupplier Portal is the enterprise application that structures all supplier communication through a secure internet-based portal. Phone calls, faxes, and e-mails with suppliers waste time, introduce errors, and create latency in your supply chain. Oracle iSupplier Portal, with its powerful platform for online collaboration, enables you and your suppliers to become more efficient.

Learn to build and implement a robust Oracle E-Business Suite system using the new release, EBS 12.2. This hands-on, real-world guide explains the rationale for using an Oracle E-Business Suite environment in a business enterprise and covers the major technology stack changes from EBS version 11i through R12.2. You will learn to build up an EBS environment from a simple single-node installation to a complex multi-node high available setup. Practical Oracle E-Business Suite focuses on release R12.2, but key areas in R12.1 are also covered wherever necessary. Detailed instructions are provided for the installation of EBS R12.2 in single and multi-node configurations, the logic and methodology used in EBS patching, and cloning of EBS single-node and complex multi-node environments configured with RAC. This book also provides information on FMW used in EBS 12.2, as well as performance tuning and EBS 12.2 on engineered system implementations.

What You Will Learn:

- Understand Oracle EBS software and the underlying technology stack components
- Install/configure Oracle E-Business Suite R12.2 in simple and HA complex setups
- Manage Oracle EBS 12.2
- Use online patching (adop)
