The Oracle basics part covers the fundamentals of the Oracle Database. The main goal of this tutorial series is to help you build a strong Oracle Database Foundation. After completing this series, you'll be able to write complex SQL statements for querying data and managing database objects. This tutorial series is practical, therefore, you need to access an Oracle Database 12c, 18c, or 19c environment for the hands-on exercises and proof of concepts.

Oracle database (Oracle DB) is a relational database management system (RDBMS) from the Oracle Corporation. The system is built around a relational database framework in which data objects may be directly accessed by users (or an application front end) through structured query language (SQL). Database features provided by Oracle are:
