with two sections covering basic
geometries of molecules, and new

and carbohydrate metabolism. Worked
examples have been added to
chapters on synthesis, and end-of-
chapter problems have been
expanded by more than 200. The text

On the cover of this book is a Pacific yew tree, found in the ancient forests of the Pacific Northwest. The bark of

File Type PDF Organic Chemistry Solomons 10th

the Pacific yew tree produces Taxol, found to be a highly effective drug against ovarian and breast cancer. Taxol blocks mitosis during eukaryotic cell division. The supply of Taxol from the Pacific yew tree is vanishingly small, however. A single 100-year-old tree provides only about one dose of

File Type PDF Organic Chemistry Solomons 10th

the drug (roughly 300 mg). For this reason, as well as the spectacular molecular architecture of Taxol, synthetic organic chemists fiercely undertook efforts to synthesize it. Five total syntheses of Taxol have thus far been reported. Now, a combination of isolation of a related metabolite from

File Type PDF Organic Chemistry Solomons 10th

European yew needles, and synthesis of Taxol from that intermediate, supply the clinical demand. This case clearly demonstrates the importance of synthesis and the use of organic chemistry. It's just one of the many examples used in the text that will spark the interest of students and get
