Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our

extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates.

There are few aspects of the modern world that remain untouched by Charles Darwin's legacy. His ideas have affected everything from science to religion, and have influenced debates about ethics, animal welfare and nature versus nurture. But who was Charles Darwin, and why has he remained such a pivotal and controversial figure, over a hundred years on from his death? How has Darwinism changed psychology, biology and the behavioural sciences? Lance Workman, an expert in evolutionary psychology, explores these questions in this thought-provoking introduction to the life, works and legacy of one of science's greatest thinkers. It is essential reading for anyone interested in evolution and the human condition.
