addresses new trends, in particular agile project management (Chapter 14 Project Management) and agile methodologies (Chapter 16 Methodologies).

The primary purpose of fitness and body composition standards in the U.S. Armed Forces has always been to select individuals best suited to the physical demands of military service, based on the assumption that proper body weight and composition supports good health, physical fitness, and appropriate military appearance. The current epidemic of overweight and obesity in the United States affects the military services. The pool of available

Recruits is reduced because of failure to meet body composition standards for entry into the services and a high percentage of individuals exceeding military weight-for-height standards at the time of entry into the service leave the military before completing their term of enlistment. To aid in developing strategies for prevention and remediation of overweight in military personnel, the U.S. Army Medical Research and Materiel Command requested the Committee on Military Nutrition Research to review the scientific evidence for: factors that influence body weight, optimal components of a weight loss and weight maintenance program, and the role of gender, age, and

The authors of this book challenge prevailing ideas about free markets and globalization. They question whether globalization is a technological reality that cannot be stopped and ask if the US economy really outperformed its competitors in the 1990s. They show how in each key area--trade and industrial policy, privatization, intellectual property rights, investment and financial policies, exchange rate and currency policy, labour and social welfare --there are alternatives to neoliberal policies that the historical experience of particular countries prove really works.
