Environment management and sustainability have become hackneyed terms in management parlance, but they are surprisingly underrated in their practical applications. Do organizations see sustainability as a solo initiative of a department to fulfil the statutory requirements or is it an

investment towards the well-being of people, planet and profitability? If so, then how important is the contribution of HR towards the greening of an organization? The book is an industrious guide on Green HR and sustainability practices towards fulfilling the three-pronged goals of triple bottom line. Through the success stories of employees as change agents, it showcases how Green HRM can mesh sustainability with strategy by linking organizational factors such as vision and mission, leadership, organizational culture and employees' pro-environmental attitude with

many people have proclaimed the imminent arrival of the paperless office. Yet even the World Wide Web, which allows almost any computer to read and display another computer's documents, has increased the amount of printing done. The use of e-mail in an organization causes an average 40 percent increase in paper consumption. In *The Myth of the Paperless Office*, Abigail Sellen and Richard Harper use the study of paper as a way to understand the work that people do and the reasons they do it the way they do. Using the tools of ethnography and cognitive psychology, they look at

paper use from the level of the individual up to that of organizational culture.

Central to Sellen and

Harper's investigation is the concept of

"affordances"—the activities that an object allows, or

affords. The physical

properties of paper (its

being thin, light, porous,

opaque, and flexible) afford

the human actions of

grasping, carrying, folding,

writing, and so on. The

concept of affordance allows

them to compare the

affordances of paper with

those of existing digital

devices. They can then ask

what kinds of devices or

systems would make new kinds

of activities possible or better support current activities. The authors argue that paper will continue to play an important role in office life. Rather than pursue the ideal of the paperless office, we should work toward a future in which paper and electronic document tools work in concert and organizational processes make optimal use of both.
