Medical-Surgical Nursing Made Incredibly Easy!, Second Edition, is a practical, informative reference in the entertaining, award-winning Incredibly Easy! style. This thoroughly updated edition covers hundreds of disorders and includes new chapters on end-of-life care and obesity, plus sixteen pages of full-color illustrations, sidebars on evidence-based practice pointers, and a patient resources appendix. Chapters feature key points summaries, light-hearted headings, and illustrations and are formatted to help readers find information easily. Quick-scan tables, flow charts, key terms, bullets, checklists, graphic logos, and cartoon characters highlight essential information. A bound-in CD-ROM contains over 300 NCLEX®-style questions, plus concept maps and other tools.

A comprehensive guide to pathology uses cartoons and detailed illustrations to help explain basic concepts, presenting symptoms, risk factors, and causes of disorders and diseases that occur all over the body.

The latest spinoff of the Incredibly Easy! Series®, the Incredibly Visual! Pocket Guides are compact, carry-anywhere references that use stunning full-color photos and illustrations and brief, easy-to-read text to present must-know clinical concepts. Ideally suited for visual learners, the information is easy to learn and recall because the visual images leave a lasting impression, and most topics are covered on a two-page spread. **Pathophysiology: An Incredibly Visual!** Pocket Guide presents risk factors and pathophysiologic changes associated with more than 150 disorders and health problems, including heart failure, valvular disease, ARDS, asthma, lung cancer, pressure ulcer, stroke, AIDS, rheumatoid arthritis, hypertension, and more.

Presents information logically, based on the pathophysiology of disease, significance of evidence, and avoidance of harmful effects inherent at the critical care level of nursing practice. Chapters include critical care basics, holistic care issues, body system-based conditions, and hematologic, immune and multisystem disorders. This new edition is completely updated to incorporate the spectrum of critical care and evidence-based nursing practice, ranging from moderate sedation and perianesthesia management to special concerns for patients who are elderly, the types of shock, management of stroke, and more.

Provides a conceptual overview of pathophysiology and mechanisms of disease, designed to ease the transition from the basic sciences to the clinical years. This book will be a phenomenal learning tool for students in the second and third years of medical school and during USMLE Step 1 preparation, but will also be very helpful to nurses, nurse practitioners, physician assistants, and other health care professionals seeking to learn or review the physiological mechanisms of diseases, their diagnosis, and their management. The accompanied CD, Differential Diagnosis, allows one to select a symptom, sign, or lab finding and see all of the many diseases that could cause it, classified by pathophysiological mechanism. By teaching basic medical science and clinical reasoning hand-in-hand in a simple, light, and highly accessible writing style, this book provides an integrated and easy-to-understand approach to learning the science of medicine.

I.V. Therapy Made Incredibly Easy makes administering I.V. therapy asap. In this newest edition, nurses and other health professionals can review basics, including purpose, delivery methods, legal issues, standards, and documentation. Chapters cover peripheral and CV therapy, administration of I.V. medications (with considerations for pediatric, elderly, and home care patients), transfusion therapy, chemotherapy, and parenteral nutrition. The easy-to-read format includes light-hearted headings and illustrations to make learning fun. Bullets, checklists, graphics, and cartoon characters enhance each chapter, calling special attention to key facts. This new edition includes epidural drug administration, infection control, needleless devices, and expanded coverage of autotransfusion and hemipheresis.
