This portable, compact volume provides essential diagnostic and troubleshooting information, and is an essential tool for anyone who needs to find computer information quickly and efficiently.

A valuable resource for any PC user, this self-paced exercise book provides hands-on experience and troubleshooting in all major hardware aspects including its microprocessor, memory, I/O systems, floppy and hard drives, CD-ROMs, display adapters, sound cards, and modems. Contains 20 targeted exercises designed to familiarize users with all vital personal computer internal operations and prepare them to cope with any question or problem they will encounter with the personal computer, its peripherals, other hardware, and controlling the hardware through the Windows operating system. Sets the stage for each exercise by examining how Joe Tekk(, a fictitious computer specialist at a

fictitious company, deals with the exercise topics, then follows with Performance Objectives, Background Information, Troubleshooting Techniques, Self-Test, Familiarization Activity, Questions/Activities, and a Review Quiz. Appendices cover a wide range of more advanced microcomputer-related topics from processor architecture to hardware and software interrupts. For those interested in acquiring a strong, working knowledge of the internal operations of today's personal computers; ideal for those in the electronics, technology, and engineering industries.

Computer Service and Repair meets the requirements of the CompTIA Authorized Quality Curriculum (CAQC) program for A+ certification exams. Students do not need prior PC technical experience to benefit from the text. Topics include building and upgrading PCs, peripherals, plus troubleshooting. A chapter is dedicated to employment, including an overview of additional CompTIA, Microsoft, and other certifications that can propel careers.
