<p>Written by a sales veteran with a track record spanning millions of dollars in sealed deals, this book blends the best psychological, NLP (Neuro Linguistic Programming), and classical persuasion techniques with a street-wise, gritty success system based on the author's own hard experience.</p>

Drawing on their own hard-won experience and modeling the best customer service principles today, Hazeldine and Norton strip customer service back to the bone to reveal the essential tools necessary to become customers’ true champions.

Anyone involved in sales faces huge challenges these days, from fierce global competition and increased pressure on margins to the power of internet-savvy buyers and difficulties with getting time with prospective buyers. To succeed in sales, something more than the traditional techniques is needed. Neuro-Sell presents an effective, brain-based approach to selling that is sensitive to what’s going on in the customer’s mind. Neuro-Sell helps readers understand the importance of the unconscious and get below the surface of what people say to recognise what they really mean. Packed with examples, quizzes, templates and interactive exercises, it develops readers’ skills in building sales relationships with the four main types of buyer and outlines the five stages of neuro-negotiating that will help give readers the competitive edge.

This practical book on selling and marketing will help architects, engineers, project managers, facilities managers, surveyors, and contractors ‘sell’ themselves to prospective clients. As clients become more sophisticated at both local and international level, and as competition in the construction industry increases, both contractors and consultants have to take a more professional approach to selling themselves. This is especially true for PFI bids where vast resources are committed to winning multi-million pound contracts. Through a simple-to-follow process, illustrated with plenty of diagrams and checklists, Marketing & Selling Professional Services in Architecture & Construction sets out the seven key aspects of selling and marketing professional services. It is full of applicable ideas and examples and is well structured to enable readers to dip into the section relevant to their current needs.

When Wicked Comes Calling . . . When a mysterious stranger finds his way into her bedchamber and offers his help in landing a duke, Lady Felicity Faircloth agrees—on one condition. She’s seen enough of the world to believe in passion, and won’t accept a marriage without it. The Wallflower Makes a Dangerous Bargain . . . Bastard son of a duke and king of London’s dark streets, Devil has spent a lifetime wielding power and seizing opportunity, and the spinster wallflower is everything he needs to exact a revenge years in the making. All he must do is turn the plain little mouse into an irresistible temptress, set his trap, and destroy his enemy. For the Promise of Passion . . . But there’s nothing plain about Felicity Faircloth, who quickly decides she’d rather have Devil than another. Soon, Devil’s carefully laid plans are in chaos and he must choose between everything he’s ever wanted . . . and the only thing he’s ever desired.

? Boxing was phenomenally popular in 18th and 19th century Britain. Aristocrats attended matches and patronized boxers, and the most important fights drew tens of thousands of spectators. Promoters of the sport claimed that it showcased the timeless and authentic ideal of English manhood—a rock of stability in changing times. Yet many of the best fighters of the era were Irish, Jewish or black. This history focuses on how boxers, journalists, politicians, pub owners and others used national, religious and racial identities to promote pugilism and its pure English pedigree, even as ethnic minorities won distinction in the sport, putting the diversity of the Empire on display.

Tracing the history of religion in America as it appropriated (and was appropriated by) commercial culture, this work reveals the centrality of religion, and the marketplace, in American popular culture.
