Intended primarily for Managerial Economics courses, this text also provides practical content to current and aspiring industry professionals. Economics is a powerful tool that can help managers to manage effectively. In Managerial Economics Jeffrey Perloff and James Brander use real-world issues and examples from actual markets to show future managers how economic principles can be used in business decisions. In text examples and boxed mini-cases use actual data to illustrate how to use basic models. For example, to illustrate rivalry in oligopolistic markets, the authors look at rivalry between United and American Airlines and between Coke and Pepsi. Mini-case examples

include why American Apparel is vertically integrated and why upscale manufacturers limit the number of designer hand-bags a customer is allowed to buy. To help future managers learn to solve new problems, Perloff and Brander repeatedly demonstrate problem-solving through in-text Q&As. Each Q&A poses an important managerial or economic issue and demonstrates how to solve it using a step-by-step approach.
