As the world evolves and companies expand in both size and complexity, corporate leaders at all levels face growing challenges in how best to handle chaotic environments and uncertainty at work. Most leaders are trained to focus on the rational system, which involves such areas as growth targets, profits and losses, and strategic planning. What is often overlooked but still crucial to successful leadership is the emotional system: an instinctive pattern of actions, reactions, and interactions that help shape individuals, teams, and organizations. Resilient leaders are able to remain calm, clearheaded, and principled in spite of increasing anxiety and escalating change. In this informative and innovative text, you'll study the predictable but often unseen patterns that surface in every organization's emotional system during times of uncertainty and change and learn how to navigate them effectively. Each chapter features three "Big Ideas" that introduce new dimensions of seeing, thinking, and leading along with suggested core practices for applying them. You'll discover how to embody a calm and stable leadership presence amid daily pressures, react boldly in response to resistance and risk, forge positive relationships among coworkers and direct reports, and acknowledge your personal strengths and weaknesses as a leader. To effect change, you must first become the leader employees wish to follow.

"The significant problems we face cannot be solved at the same level of thinking we were at when we created them." -- Albert Einstein Modern business leaders are just too aware of how much the world has changed in the last decades and continues to do so. It is little wonder then that even the best of us can feel overwhelmed by the many demands we now face in our working and private lives. Summarizing the knowledge and experiences of three experts in the field, and offering practical insights from specialists around the world, this book offers a new approach to leadership and personal development by focussing on the links between these two areas. The good old times of planning one 's development in a linear, step-by-step fashion over a lifetime are over. While recognising that there are different learning styles and personality types, the authors present a more proactive, flexible and emergent approach to your development. Topics such as sustainability, complexity and creativity are considered key issues that should play a role in not only developing a positive, future society, but also in refining the current and future you. This modern approach will give you a cutting-edge advantage in our fast changing world. Since the three authors whole heartedly agree with Einstein 's maxim, this book should be considered an attempt to equip you with new levels of thinking and new skill sets to make you more successful at leading and developing yourself and others in a variety of contexts. With structured activities and proven techniques from people who have successfully applied the lessons found in this book, Leadership and Personal Development, A toolbox for the 21 century professional, you will be armed with an effective approach to development.

Use this helpful book to learn about the leadership tools to fuel success, grow your team, and become the visionary you were meant to be. True leadership isn't a matter of having a certain job or title. In fact, being chosen for a position is only the first of the five levels every effective leader achieves. To become more than "the boss" people follow only because they are required to, you have to master the ability to invest in people and inspire them. To grow further in your role, you must achieve results and build a team that produces. You need to help people to develop their skills to become leaders in their own right. And if you have the skill and dedication, you can reach the pinnacle of leadership—where experience will allow you to extend your influence beyond your immediate reach and time for the benefit of others. The 5 Levels of Leadership are: 1. Position—People follow because they have to. 2. Permission—People follow because they want to. 3. Production—People follow because of what you have done for the organization. 4. People Development—People follow because of what you have done for them personally. 5. Pinnacle—People follow because of who you are and what you represent. Through humor, in-depth insight, and examples, internationally recognized leadership expert John C. Maxwell describes each of these stages of leadership. He shows you how to master each level and rise up to the next to become a more influential, respected, and successful leader.
