A family moves into a beautiful old home in rural Maine, not realizing the horror that awaits them from the pet cemetery and Indian burial ground behind the house.
The newly built Kingdom Hospital in Lewiston, Maine, is one of the most technologically advanced hospitals in the country. Unfortunately, it was erected on the site of a terrible tragedy -- a textile mill fire that killed dozens of workers, mostly children. And it appears that beneath the sheen of the new construction and scientific innovations of The Kingdom, an indecipherable and primal evil lurks -- and the soul of a trapped and helpless child cries out for solace.

Stephen King's legendary debut, the bestselling smash hit that put him on the map as one of America's favorite writers "Gory and horrifying. . . . You can't put it down." —Chicago Tribune Unpopular at school and subjected to her mother's religious fanaticism at home, Carrie White does not have it easy. But while she may be picked on by her classmates, she has a gift she's kept secret since she was a little girl: she can move things with her mind. Doors lock. Candles fall. Her ability has been both a power and a problem. And when she finds herself the recipient of a sudden act of kindness, Carrie feels like she's finally been given a chance to be normal. She hopes that the nightmare of her classmates' vicious taunts is over . . . but an unexpected and cruel prank turns her gift into a weapon of horror so destructive that the town may never recover.

Uncover the theories behind the Master of Horror's macabre tales: It, The Shining, Carrie, Cujo, Misery, Pet Sematary, and so much more! Gothic media moguls Meg Halldahl and Kelly Florence, authors of The Science of Monsters and The Science of Women in Horror, and co-hosts of the Horror Rewind podcast called "the best horror film podcast out there" by Film Daddy, present a guide to the Stephen King stories and characters we all know and love. Through interviews, literary and film analysis, and bone-chilling discoveries, The Science of Stephen King delves into the uniquely horrific Stephen King universe to uncover the science behind the legendary novels that have become an integral part of modern pop culture, answering such questions as: What is the science behind time travel and parallel universes like in The Dark Tower series and 11/22/63? How does lack of sleep affect the human body like in Insomnia? Is it possible for horrific creatures to exist like in Nightshift? What is the science behind curses and legends like in Dreamcatcher and Thinner? Join Kelly and Meg as they learn if we all really do float down here! "If you love all things Stephen King, horror, and science, then you'll absolutely love this book! Authors Meg Halldahl and Kelly Florence intricately discuss and decipher the science behind some of Stephen King's most legendary stories, creations, and monsters. This in-depth exploration into all things King and science is a must-read!"—Jennifer Trudrung, screenplay writer of The Bewailing and Here There be Tygers, a Stephen King Dollar Baby film

Written by the author of Carrie, The Shining, Night Shift, The Stand, Pet Sematary, Misery, It, The Dark Half and Four Past Midnight.

The Maine writer, as many call him, was predestined to become the best horror writer in history. His literary career proves it. In spite of having to endure hundreds of rejections for his first stories and novels, destiny was written: the nail that held the rejection letters finally fell to the floor. Stephen King began writing at the early age of eight, and would publish his beginnings in his first stories. The kids at school read his stories. It was not easy to publish Carrie, the novel that launched his career. Previously, he lived on many different jobs, and the checks he charged for his stories. Death and fear were always by his side before he dug graves in the local cemetery in his teenage years, as his first paid job. His tenacity and constancy made him be recognized as the "King", tribute to his lastname. Here, you will discover his beginnings: since his great grandparents, grandparents, parents, poverty, his father's manuscript box, his first stories, his time in high school he doesn't want to remember, college, his first novels, his job as an english teacher, his alter ego, his problems... and finally his success among the masses. This is a study of his first stage, Stephen King's finest, the one that left an impact on us and the reason why we call him the king of horror. One day his finger randomly fell on a United States map, in Colorado, on Hotel Stanley. He followed the destiny he was meant to follow. Can you guess what story it is?

#1 New York Times bestselling author Stephen King's terrifying novella about a town engulfed in a dense, mysterious mist as humanity makes its last stand against unholo destruction—originally published in the acclaimed short story collection Skeleton Crew and made into a TV series, as well as a feature film starring Thomas Jane and Marcia Gay Harden. In the wake of a summer storm, terror descends...David Drayton, his son Billy, and their neighbor Brent Norton join dozens of others and head to the local grocery store to replenish supplies following a freak storm. Once there, they become trapped by a strange mist that has enveloped the town. As the confinement takes its toll on their nerves, a religious zealot, Mrs. Carmody, begins to play on their fears to convince them that this is God's vengeance for their sins. She insists a sacrifice must be made and two groups—those for and those against—are aligned. Clearly, staying in the store may prove fatal, and the Draytons, along with store employee Ollie Weeks, Amanda Dumfries, Irene Reppler, and Dan Miller, attempt to make their escape. But what's out there may be worse than what they left behind. This exhilarating novella explores the horror in both the enemy you know—and the one you can only imagine.

Describes the life and writing career of the American author famous for his horror novels and stories, including "The Shining," "Carrie," and "Misery."
