The car had three wheels and operated on a steam engine. It was designed by an engineer L é on Serpollet. Peugeot Type 1 was able to reach 25 km/h speed and its engine had 4 hp power. The next year, a modernized 4-wheel car Peugeot Type 2 was produced; it had a Daimler petrol V-type internal combustion engine. The model was much more sophisticated than its contemporaries, because it had chain transmission and was able to seat up two passengers.

developing employment that can result in faster and more inclusive economic growth. It also presents a case study on a leading manufacturing subsector—the automotive industry. The book then offers a set of analyses concerning the country ' s trade sector, including exchange rate policies, ways to connect to global markets, and accession to the World Trade Organization. In turn, the closing chapters investigate various aspects of Iran ' s labor market and offer policy recommendations on the creation of productive jobs. Readers will learn about effective industrial, trade, and employment policies that can complement macroeconomic measures adopted by the government. As such, the book will appeal not only to scholars and policy-makers, but also to international investors seeking to understand various core aspects of Iran ' s industrial and employment structures and trade regime.
