The Peugeot Bipper Tepee (like its close relatives the Citroen Nemo Multispace and Fiat Qubo) takes an old theme and gives it a modern twist. It's an inherently good idea. Jason Conrad, a man with the wealth of Bill Gates, decides to preserve for posterity the seeds of as many animal and plant species as possible in a vast and remote underground facility, taking the world's legitimate seed banks and "frozen zoos" to a whole new level. Conrad's secret doomsday complex, though, is staffed by a combination of environmental experts and mercenaries who will stop at nothing to achieve their once-noble ambitions. After a fellow police officer is murdered and his award-winning German shepherd disappears, Montreal Sergeant-Detective Irina Drach and her young partner, Sergeant-Detective Hudson, connect the crime with a seed bank raid in Ardingly, England, and the kidnapping of a Triple Crown Thoroughbred named Zarathustra. Soon it becomes apparent that highly organized, ruthless abduction teams are raiding seed banks around the world, as well as scooping up the finest animal specimens from zoos, nature preserves, and the wild. Despite the global implications and ballooning media interest, however, Irina never forgets that her foremost aim is to solve the murder of a friend and fellow officer.

The rapid takeoff of the continent-sized national economies and the increasing expense of extraction have led to strong tensions in petrol prices and a race towards alternative driving systems. This book analyses the emergence of a second automobile revolution through the trajectories of automobile firms since the nineties.

This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations.
