A PhD student will often work alone or with limited collaboration, which can lead to them feeling isolated and lacking in motivation. For this reason, you should aim to accept any support that is offered to you, and remain in contact with as many PhD students as possible.

Helping Doctoral Students Write offers a proven approach to effective doctoral writing. By treating research as writing and writing as research, the authors offer pedagogical strategies for doctoral supervisors that will assist the production of well-argued and lively dissertations. It is clear that many doctoral candidates find research writing complicated and difficult, but the advice they receive often glosses over the complexities of writing and/or locates the problem in the writer. Kamler and Thomson provide a highly effective framework for scholarly work that is located in personal, institutional and cultural contexts. The pedagogical approach developed in the book is based on the notion of writing as a social practice. This approach allows supervisors to think of doctoral writers as novices who need to learn new ways with words as they enter the discursive practices of scholarly communities. This involves learning sophisticated writing practices with specific sets of conventions and textual characteristics. The authors offer supervisors practical advice on helping with commonly encountered writing tasks such as the proposal, the journal abstract, the literature review and constructing the dissertation argument. The first edition of this book has helped many academics and thousands of research students produce better written material. Now fully updated the second edition includes: Examples from a broader range of academic disciplines A new chapter on writing from the thesis for peer reviewed journals More advice on reading and note taking, performance and conferences. Further information on developing a personal academic writing style, and Advice on the use of social media (blogs, tweets and wikis) to create trans-disciplinary and trans-national networks and conversations. Their discussion of the complexities of forming a scholarly identity is illustrated throughout by stories and writings of actual doctoral students. In conclusion, they present a persuasive and proven argument that universities must move away from simply auditing supervision to supporting the development of scholarly research communities. Any supervisor keen to help their students develop as academics will find the ideas and practical solutions presented in this book fascinating and insightful reading.

The Story Behind THE LEGEND OF BAGGER VANCE If you've read his books THE WAR OF ART and TURNING PRO, you know that for thirty years Steven Pressfield (GATES OF FIRE, THE AFGHAN CAMPAIGN etc.) wrote spec novel after spec novel before any publisher took him seriously. How did he finally break through? Ignoring just about every rule of commercial book publishing, Pressfield's "first" novel not only became a major bestseller (over 250,000 copies sold), it was adapted into a feature film directed by Robert Redford and starring Matt Damon, Will Smith, and Charlize Theron. Where did he get the idea? What magical something did THE LEGEND OF BAGGER VANCE have that his previous manuscripts lacked? Why did Pressfield decide to write a novel when he already had a well established screenwriting career? How does writing a publishable novel really work? Taking a page from John Steinbeck's classic JOURNAL OF A NOVEL, Steven Pressfield offers answers for these and scores of other practical writing questions in THE AUTHENTIC SWING.

What if writing scientific papers was faster, easier, and a bit less painful? This book provides a step-by-step, top-down approach that makes it easier to turn your hard-won results into research papers that your fellow scientists want to read and cite. "I just wrote a (rough) first draft of a paper during a 3-hour flight, and if it wasn't for these teachings, this would have taken me days (if not weeks)!" -Talayeh Aledavood, James S. McDonnell Postdoctoral Fellow, University of Helsinki The book's systematic approach builds on what I've learned through coauthoring close to 100 research papers with students. You'll learn how to outline your paper from top to down, how to develop your story, and how to think about what to write before you write it. You'll also learn how to deal with many issues that writers of science commonly face, from the fear of the blank page to dealing with critical reviews. Here's what you get: A complete step-by-step plan for writing a scientific paper, from choosing which results to include to wrapping up the paper in the Discussion section Concrete, actionable, and practical advice, from a paragraph-level template for the Introduction to guidance on preparing plots and figures Lots of writing tips, from placing signposts in your text to shortening and straightening your sentences This book has been written for the PhD student who is aiming to write a journal article on her research results, but it should also be useful to any scientist who has ever found writing difficult. Whatever the stage of your career, if you'd like to learn how to write research papers systematically and efficiently, this is the book for you! The book includes PART I: STORY 1. How To Choose The Key Point Of Your Paper 2. How To Choose The Supporting Results 3. How To Write The Abstract 4. How To Choose The Title PART II: OUTLINE 5. The Power Of Outlining 6. How To Write The Introduction, Part I: Structure 7. How To Write The Introduction, Part II: A Four-Paragraph Template 8. How To Write The Introduction, Part III: The Led e 9. How To Write The Materials And Methods 10. How To Write The Results, Part I: Figures 11. How To Write The Results, Part II: Text 12. How To Write The Discussion PART III: WORDS 13. How Does Your Reader Read? 14. How To Write Your First Draft 15. How To Edit Your First Draft 16. Tips For Revising Content And Structure 17. Tips For Editing Sentences PART IV: IT'S NOT OVER YET 18. How To Write The Cover Letter 19. How To Deal With Reviews About the author I am a professor of computational science and an experienced academic with around 100 published papers. My research is interdisciplinary, to say the least: I have studied the social fabric of smartphone users, the genetic structure of ant supercolonies, the connectome of the human brain, networks of public transport, and the molecular biology of the human immune system, to name a few. So one could say that I have a broad range of scientific interests (or that I simply cannot choose). But that's exactly the way I like it!

This book is for graduate students—and others—who want to become more productive writers. It's especially written for those who want to: [ increase their motivation, focus, and persistence to move a project to completion [ overcome procrastination and perfectionistic tendencies [ reduce (or write in spite of) their anxiety and fear of writing [ manage their time, work, energy (and advisor) for greater productivity The process or craft of sustained writing is not a matter that's taught to undergraduate or graduate students as part of their studies, leaving most at sea about how to start a practice that is central to a career in academe and vital in many other professional occupations. This book grew out of conversations Jan Allen has held with her graduate students for over 30 years and reflects the fruit of the writing workshops and boot camps she has conducted at three universities, her own and numerous colleagues' experiences with writing and advising, as well as the feedback she receives from her popular Productive Writer listserv. While Jan Allen recognizes that writing is not an innate talent for most of us, she demonstrates that it is a process based on skills which we can identify, learn, practice and refine. She focuses both on the process and habits of writing as well as on helping you uncover what kind of writer are you, and reflect on your challenges and successes. With a light touch and an engaging sense of humor, she proposes strategies to overcome procrastination and distractions, and build a writing practice to enable you to become a more productive and prolific writer. Jan Allen proposes that you read one of her succinct chapters [ each devoted to a specific strategy or writing challenge [ each day, or once a week. When you find one that increases your concentration, motivation or endurance, make it a habit. Try it for two weeks, charting the resulting increased productivity. It will become part of your repertoire of writing and productivity tools to which you can progressively add.

Authoring a PhD is a complex process. It involves having creative ideas, working out how to organize them, writing up from plans, upgrading the text, and finishing it speedily and to a good standard. It also includes being examined and getting published. Patrick Dunleavy has written Authoring a PhD based on his supervision experience with over 30 students. It provides solid advice to help your PhD students cope with both the intellectual issues and practical difficulties of organizing their work effectively. It is an indispensable and time saving aid for doctoral students in the humanities, social sciences, education, business studies, law, health, arts and visual arts, and related disciplines, and will also be a great help to supervisors.

Using qualitative data collected from more than twenty universities across the US, Writing Support for International Graduate Students describes and theorizes agency- and advocacy-driven practices, programs, and policies that are most effective in helping international students learn graduate-level writing and communication skills. It uses compelling narratives and cases to illustrate a variety of program models and support practices that fostered the students' process of academic transition and success. Employing an ecological framework, the book seeks to advance academic conversation about how writing scholars/instructors and program administrators, as well as other academic service professionals working with this student body, can formulate policies, develop programs, and implement practices that best help these students grow as writers and scholars in their disciplines.

Expert writing advice from the editor of the Boston Globe best-seller, The Writer's Home Companion Dissertation writers need strong, practical advice, as well as someone to assure them that their struggles aren't unique. Joan Bolker, midwife to more than one hundred dissertations and co-founder of the Harvard Writing Center, offers invaluable suggestions for the graduate-student writer. Using positive reinforcement, she begins by reminding thesis writers that being able to devote themselves to a project that truly interests them can be a pleasurable adventure. She encourages them to pay close attention to their writing method in order to discover their individual work strategies that promote productivity; to stop feeling fearful that they may disappoint their advisors or family members; and to tailor their theses to their own writing style and personality needs. Using field-tested strategies she assists the student through the entire thesis-writing process, offering advice on choosing a topic and an advisor, on disciplining one's self to work at least fifteen minutes each day; setting short-term deadlines, on revising and defing the thesis, and on life and publication after the dissertation. Bolker makes writing the dissertation an enjoyable challenge.

I have purchased the "Personalized Back Cover" option and this is the text that should appear at the back cover of my book: Is there room for yet another book on PhD-writing? Yes there is. Most of the available publications on this topic are contributions from professional academics, written from the perspective of supervisors or examiners rather than from that of successful candidates. Most of them are too long and not always user-friendly, while their approach is, more often than not, too scientific to be accessible to the average candidate. It is with these considerations in mind that the author, an average doctoral candidate who wrote his PhD thesis while working full-time, submitting his written work for examination within 24 months of becoming registered as a research student in one of the UK's top Law Schools, set out to write this book, which is, uniquely, written from a student's perspective. What makes of this work an original contribution is not the novelty of the topic addressed in it but, rather, its brevity, its practical approach, its simplicity, the background of its author (a recent, successful PhD candidate) and the motivation of its author: to help candidates complete their PhD thesis in under three years, as the author of this book did. This short book contains a wealth of practical advice and guidance on the issues involved in conceptualizing, organizing and writing your doctoral thesis so that you can increase your chances of surviving the ordeal of PhD thesis writing with the least amount of pain and with the minimum investment in terms of the time and effort spent pursuing your objective.

You don't have to be a genius to write a PhD. Of course, it will always involve a lot of hard work and dedication, but the process of writing is a whole lot easier if you understand the basic ground rules. This book is a guide through the dos and don'ts of writing a PhD. It will be your companion from the point when you decide to do a PhD, providing practical guidance to getting started, all the way through the nuts and bolts of the writing and editing process. It will also help you to get - and stay - in the right mental framework and establish good habits from the beginning, putting you in a commanding position later on. Examples are tailored to the biological sciences, offering a unique reference for PhD students in these disciplines. Embarking on a PhD doesn't need to be daunting, even if it's your first experience working within academia. Each short section focuses on writing - considered by many to be the most difficult aspect of a PhD - and delves into a practical detail of one aspect, from the title to the supplementary material. Whether you're a student just starting your studies, an early career researcher or a supervisor struggling to cope, the book provides the insider information you need to get ahead.

Developing Research Writing is designed to encourage, inspire and improve the advisory practice of providing writing feedback. This book provides insights and advice that supervisors can use to advance their support of their research students' writing and, at the same time, survive increasing supervisory demands. Book parts are framed by empirical supervisor and doctoral student experiences and chapters within each part provide multiple approaches. The carefully chosen contributors are specialists on research writing and doctoral pedagogy, who guide the reader through the key stages of providing feedback. Split into nine key parts the book covers: starting a new supervision with writing in focus; making use of other resources along the way; encouraging style through control of language; writing feedback on English as an Additional Language (EAL) writing; Master's and Honours smaller projects' writing feedback; thesis by publication or performance-based writing; maintaining and gathering momentum; keeping the examiner happy; writing feedback as nudging through identity transition. The parts cohere into a go-to handbook for developing the supervision process. Drawing on research, literature and experience, Developing Research Writing offers well-theorized, yet practical and grounded advice conducive to good practices.
