Physics is a grand and frightening story of scientific ambition, intrigue, and genius: a tale barely believable as fiction, which just happens to be historical fact.

Following Fermi's

departure for the
United States in 1938

and the disruption of
the original group,

Amaldi took upon
himself the task of
reorganising the

research in physics in
the difficult situation of
post-war Italy. His

own research went
from nuclear physics
to cosmic ray physics,

and, in later years,

Active research was
for him always

involvement as a

and an organiser: he

was the leading figure

of INFN (National
Institute for Nuclear

Physics) and has
