Tariq is instructed to eliminate the only witness and instigate a cover up, trapping him in a terrible moral dilemma. At the close of the Second World War both the RAF and the United States Army Air Forces sent teams of investigators to the continent of Europe to try and assess the effectiveness of Allied strategic bombing. The British Survey was originally classified and is published here for the first time. By combining the original Report and an analysis of its strengths and weaknesses, together with a short history of the genesis of the British Survey, this work is an important contribution to the continuing historical debate over the effects of the strategic bombing offensive in the Second World War.

The 25-year period beginning with the Allied occupation of Italy in 1943 and ending with the social upheavals of 1968 witnessed a renaissance of artistic development that touched virtually every part of Italy's culture, with painters like Lucio Fontana challenging painting's two-dimensionality and traditional subject-matter. In the United States, artistic preeminence in the postwar period is generally accorded to Americans; this volume, which includes 20 essays and over 600 color reproductions, demonstrates that in terms of invention and influence Italian artists played a varied and important role during this period.

Explores design from the Industrial Revolution to the present, discussing high Victorian design, arts and crafts ideals, the modern movement, post-war design, 1960s pop and op art, postmodernism, and contemporary design.
