

seen as an elaboration of various ancient Ayurvedic practices that leads to the complete well-being of the mother and child's physical, spiritual and psychological health. It also advises on the traditional herb mixes, yoga, music and mantras that the new-mothers or the mothers-to-be may find helpful. Besides, this book also charts a nutritious Ayurvedic diet-plan for the couples to detoxify their bodies and be healthy in the right sense of the term. Once a mother conceives, she must be able to nourish and condition the little one in her womb. Likewise, this book also provides a month-by-month nutrition plan that helps in proper nourishment of the baby. Yoga and full-body herbal oil massages during pregnancy are also recommended for the mothers-to-be along with a list of health tonics prescribed in this book. In order to reach out to more people worldwide, this book has been translated in English, and is available in hardcover.

Epilepsy in pregnancy poses a serious threat to the mother and to her developing child. Even in previously well-controlled epilepsy, physiological changes in the mother during pregnancy and also during labour and delivery can alter the pharmacokinetic drug (AED) therapy causing increased seizure frequency.

At a UN General Assembly Special Session in 1999, governments recognised unsafe abortion as a major public health concern, and pledged their commitment to reduce the need for abortion through expanded and improved family planning services, as well as ensure abortion services should be safe and accessible. This technical and policy guidance provides a comprehensive overview of the many actions that can be taken in health systems to ensure that women have access to good quality abortion services as allowed by law.
