It should have been exhausting, but Nicky Drayden ushered me through the story in such a way that I was always hungry for the next thing. And the next. And the next. If you’re looking for a big story with big characters doing their best, I highly recommend THE PREY OF GODS. The narration by Prentice Onayemi is wonderful.

From a new voice in the tradition of Lauren Beukes, Ian McDonald, and Nnedi Okorafor comes The Prey of Gods, a fantastic, boundary-challenging tale, set in a South African locale both familiar and yet utterly new, which braids elements of science fiction, fantasy, horror, and dark humor. In South Africa, the future looks promising. Personal robots are making life easier for the working class. The government is harnessing renewable energy to provide infrastructure for the poor. And in the bustling coastal town of Port Elizabeth, the economy is booming thanks to the genetic engineering industry which has found a welcome home there. Yes—the days to come are looking very good for South Africans. That is, if they can survive the present challenges: A new hallucinogenic drug sweeping the country ... An emerging AI uprising ... And an ancient demigoddess hellbent on regaining her former status by preying on the blood and sweat (but mostly blood) of every human she encounters. It’s up to a young Zulu girl powerful enough to destroy her entire township, a queer teen plagued with the ability to control minds, a pop diva with serious daddy issues, and a politician with even more serious mommy issues to band together to ensure there’s a future left to worry about. Fun and fantastic, Nicky Drayden takes her brilliance as a short story writer and weaves together an elaborate tale that will capture your heart ... even as one particular demigoddess threatens to rip it out.

The Compton Crook Award-winning author weaves her trademark blend of science fiction and dark humor in this dazzling story that continues the imaginative saga begun in Escaping Exodus, in which a society lives in the belly of a beast—and an entire civilization’s survival depends on a pair of uneasy allies who must come together for one epic battle. Nearly a thousand years removed from Earth, the remnants of humanity cling to existence inside giant, space faring creatures known as the Zenzee. Abused and exploited by humans for generations, these majestic animals nearly went extinct, but under the command of its newly minted ruler, Doka Kaleigh, life in the Parados I has flourished. Thanks to careful oversight and sacrifice by all of its crew, they are now on the brink of utopia, and yet Doka’s rivals feel threatened by that success. The Senate allowed Doka to lead their people believing he’d fail spectacularly—a disaster that would cement the legitimacy of their long-standing matriarchy. Despite vocal opposition and blatant attacks on his authority, Doka has continued to handle his position with grace and intelligence; he knows a single misstep means disaster. When a cataclysmic event on another Zenzee world forces Doka and his people to accept thousands of refugees, a culture clash erupts, revealing secrets from the past that could endanger their future. For Doka, the stakes are bigger and more personal than ever before—and could cost him his reign and his heart. He has fallen for the one woman he is forbidden to love: his wife, Seske. Doka and Seske must work closely together to sway the other Zenzee worlds to stop their cycles of destruction. But when they stumble upon a discovery that can transform their world, they know they must prepare to fight a battle where there can be no winners, only survivors.

“Don’t be alarmed - that dizzy pleasurable sensation you’re experiencing is just your brain slowly exploding from all the wild magnificent worldbuilding in Nicky Drayden’s Escaping Exodus. I loved these characters and this story, and so will you.” - Sam J. Miller, Nebula-Award-winning author of The Art of Starving and Blackfish City The Compton Crook award-winning author of The Prey of Gods and Temper returns with a dazzling stand-alone novel, set in deep space, in which the fate of humanity rests on the slender shoulders of an idealistic and untested young woman—a blend of science fiction, dark humor, and magical realism that will appeal to fans of Charlie Jane Anders, Jeff VanderMeer, and Nnedi Okorafor. Earth is a distant memory. Habitable extrasolar planets are still out of reach. For generations, humanity has been clinging to survival by establishing colonies within enormous vacuum-breathing space beasts and mining their resources to the point of depletion. Rash, dreamy, and unconventional, Seske Kaleigh should be preparing for her future role as clan leader, but her people have just culled their latest beast, and she’s eager to find the cause of the violent tremors plaguing their new home. Defying social barriers, Seske teams up with her best friend, a beast worker, and ventures into restricted areas for answers to end the mounting fear and rumors. Instead, they discover grim truths about the price of life in the void. Then, Seske is unexpectedly thrust into the role of clan matriarch, responsible for thousands of lives in a harsh universe where a single mistake can be fatal. Her claim to the throne is challenged by a rival determined to overthrow her and take control—her intelligent, cunning, and confident sister. Seske may not be a born leader like her sister, yet her unorthodox outlook and incorruptible idealism may be what the clan needs to save themselves and their world.

A scavenger robot wanders in the wasteland created by a war that has destroyed humanity in this evocative post-apocalyptic “robot western” from the critically acclaimed author, screenwriter, and noted film critic. It’s been thirty years since the apocalypse and fifteen years since the murder of the last human being at the hands of robots. Humankind is extinct. Every man, woman, and child has been liquidated by a global uprising devised by the very machines humans designed and built to serve them. Most of the world is controlled by an OWI—One World Intelligence—the shared consciousness of millions of robots, uploaded into one huge mainframe brain. But not all robots are willing to cede their individuality—their personality—their personality—for the sake of a greater, stronger, higher power. These intrepid resisters are outcasts; solo machines wandering among various underground outposts who have formed into an unruly civilization of rogue AIs in the wasteland that was once our world. One of these resisters is Brittle, a scavenger robot trying to keep a deteriorating mind and body functional in a world that has lost all meaning. Although unable to experience emotions like a human, Brittle is haunted by the terrible crimes the robot population perpetrated on humanity. As Brittle roams the Sea of Rust, a large swath of territory that was once the Midwest, the loner robot slowly comes to terms with horrifyingly raw and vivid memories—and nearly unbearable guilt. Sea of Rust is both a harsh story of survival and an optimistic adventure. A vividly imagined portrayal of ultimate destruction and desperate tenacity, it boldly imagines a future in which no hope remains, yet where a humanlike AI strives to find purpose among the ruins.

When a wounded Lord Kerrick staggers back into Rebecca Marche’s arms, she vows that she will find a way to make him whole, disguises him as a poet in order to clear his name as a traitor, and then struggles to hide her love for him. Original.
