In writing this textbook, Mankiw has tried to put himself in the position of someone seeing economics for the first time. The author's conversational writing style is superb for presenting the politics and science of economic theories to tomorrow's decision-makers. Because Mankiw wrote it for the students, the book stands out among all other principle texts by intriguing students to apply an economic way of thinking in their daily lives. Receiving such praise as "perhaps the best ever" textbook in economic principles, it's no wonder Mankiw's prize project has quickly become one of the most successful books ever to be published in the college marketplace.

With this edition, Eric Chiang continues to link economics concepts to topics of personal interest to students. The new edition is a thoroughly contemporary, fully integrated print/technology resource that adapts to the way you want to teach. As always, this concise book focuses on the topics most often covered in the principles course, but with this edition, it offers a stronger emphasis than ever on helping students apply an economic way of thinking to the overwhelming flow of data we face every day. Economics: Principles for a Changing World is fully informed by Eric Chiang's experiences teaching thousands of students worldwide, both in person and online. Developing the text, art, media, homework, and ancillaries simultaneously, Chiang translates these experiences into a cohesive approach that embodies the book's founding principles: To use technology as a tool for learning--before lectures, during class, when doing homework, and at exam time. To help students harness the data literacy they'll need as consumers of economic information.

This book deliberately avoids an encyclopedic approach. The text is selective rather than exhaustive in its methodology. It adopts a slightly more analytical perspective to the study of economics, which challenges students to think critically while applying core economic principles to each scenario. Australian authors.
