"[This book examines] key principles and cases by leveraging the distinct voices of leading scholars and instructors from across Canada. This ... analysis gives students a better sense of how administrative boards and tribunals work in practice. To offer a more comprehensive understanding of subject matter, resources like practice tips, checklists, and a companion website have also been included in the text. This combination of theory and applied learning has resulted in a highly effective teaching tool that students can take from the classroom into practice."--Publisher's description.

Thinking About Clinical Legal Education provides a range of philosophical and theoretical frameworks that can serve to enrich the teaching and practice of Clinical Legal Education (CLE). CLE has become an increasingly common feature of the curriculum in law schools across the globe. However, there has been relatively little attention paid to the theoretical and philosophical dimensions of this approach. This edited collection seeks to address this gap by bringing together contributions from the clinical community, to analyse their CLE practice using the framework of a clearly articulated philosophical or theoretical approach. Contributions include insights from a range of jurisdictions including: Brazil, Canada, Croatia, Ethiopia, Israel, Spain, UK and the US. This book will be of interest to CLE academics and clinic supervisors, practitioners, and students.

The classic text of the diary Anne Frank kept during the two years she and her family hid from the Nazis in an Amsterdam attic is a powerful reminder of the horrors of war and an eloquent testament to the human spirit.

Is 'sustainable development' a charade sold to an increasingly misled public? This book presents a wide-ranging, penetrating critique of sustainability and what it

actually means. The author argues that despite the rhetoric of socially and environmentally sustainable development and the ever-increasing number of legislative environmental policies, the real issues such as consumption, population growth and equity are either sidestepped or manipulated in international policy and law. Analyzing the main areas of concern - economic growth, market structure, trade, aid, debt, security and sovereignty - he shows that the entire development structure and the underpinnings of the debate are leading down quite a different path to that intended by sustainability.
