Pure and simple, to get ready for the boards, do tons of questions. There are plenty of good reviews and question banks out there. By all means, use them! Then, to make absolutely sure you pass, do THESE questions as well. This the second volume in the Pure and Simple series has the answers and explanations to the first 500 questions. Once you've gone through these, then go on to the third volume for 500 MORE questions, and use the fourth volume (to get the answers and explanations). Pure and simple, the more questions you do, the more likely you are to pass. Dr Gallagher has been helping people review for the Anesthesiology boards since the 80's. Author of the Board Stiff series, he is now writing for the written board audience.

The CliffsTestPrep series offers full-length practice exams that simulate the real tests; proven test-taking strategies to increase your chances at

doing well; and thorough review exercises to help fill in any knowledge gaps. This book is open access under a CC BY License. It provides a comprehensive overview of the core subjects comprising mathematical curricula for engineering studies in five European countries and identifies differences between two strong traditions of teaching mathematics to engineers. The collective work of experts from a dozen universities critically examines various aspects of higher mathematical education. The two EU Tempus-IV projects – MetaMath and MathGeAr – investigate the current methodologies of mathematics education for technical and engineering disciplines. The projects aim to improve the existing mathematics curricula in Russian, Georgian and Armenian universities by introducing modern technology-enhanced learning (TEL) methods and tools, as well as by shifting the focus of engineering mathematics education from a purely theoretical tradition to a more applied paradigm. MetaMath and MathGeAr have brought together mathematics educators, TEL specialists and experts in education quality assurance from 21 organizations across six countries. The results of a comprehensive comparative analysis of the entire spectrum of mathematics courses in the EU, Russia, Georgia and Armenia has been conducted, have allowed the consortium to pinpoint and introduce several modifications to their curricula while preserving the generally strong state of university mathematics education in these countriesThe book presents the methodology, procedure and results of this analysis. This book is a valuable resource for teachers, especially those teaching mathematics, and curriculum planners for engineers, as well as for a general audience interested in scientific and technical higher education.

One of Julio Cortázar's great early novels. Anyone who doesn't read Cortázar is doomed.--Pablo Neruda

In 2015, John Burke's Imagine Heaven took the book world by storm, landing on the New York Times bestseller list and selling more than half a million copies. Its exhilarating picture of heaven, drawn from Scripture and illustrated with true stories of near-death experiences, enthralled readers and offered real-life evidence that supported their faith and answered some of their most pressing questions about life after death. Scripture tells us to "Think about the things of heaven, not the things of earth" (Col. 3:2). Now readers can meditate daily on the realities of heaven with the Imagine Heaven Devotional. Each of the 100 devotions includes near-death stories from the bestselling book, Scripture, a prayer, as well as brand new stories and content that helps readers apply these heavenly promises to how they live life today.

Freshman year is always a turbulent time: adjusting to dorm life, taking exams and talking to girls. The stress of moving to a brand new city will take its toll on anyone's emotions and mental health. But for Nicky, the first year of college will be more trying than any he has ever known. When he meets the girl next door, Debbie, their communication becomes inexorably tied to his fate and mental health. He begins to hear Debbie speaking to him telepathically, and instructing him in his faith. Struggling against psychosis and battling forces he doesn't understand, he must undergo a sublime and tragic downward spiral that will challenge his spirituality and force him to confront his demons. The world around him is changing and as his life comes to its crux he must confront and record his ultimate test. Join author Edward Dunn in taking The Final Exam. Edward Dunn is an Ivy League graduate and has studied Shotokan Karate for over seven years, and is a competitive tennis player. He is the author of over one-hundred different poems and other writings, has travelled through much of Europe, the Caribbean, and the United States and has been a reporter as well as worked with disadvantaged individuals in varied settings.

Radical History Review presents innovative scholarship and commentary that looks critically at the past and its history from a non-sectarian left perspective.
