Applicants for a UCL postgraduate programme are normally expected to hold at least a 2.2 in a UK undergraduate degree (or equivalent overseas qualification). But other academic qualifications of an equivalent standard and substantial work experience and achievements at work demonstrating ability to study successfully at a postgraduate level can be taken into account.

The call for increased public involvement in the formulation of science and technology policy has resulted in the consensus conference: an initiative which involves lay people in the assessment of socially sensitive topics. This book draws together the pioneering experiences of the Danish, Dutch and British organisers of consensus conferences, as well as offering a scheme, developed at a multinational two-day workshop in 1995 in London, for producing comparable data for the evaluation of consensus conferences.

This textbook gives a comprehensive introduction to stochastic processes and calculus in the fields of finance and economics, more specifically mathematical finance and time series econometrics. Over the past decades stochastic calculus and processes have gained great importance, because they play a decisive role in the modeling of financial markets and as a basis for modern time series econometrics. Mathematical theory is applied to solve stochastic differential equations and to derive limiting results for statistical inference on nonstationary processes. This introduction is elementary and rigorous at the same time. On the one hand it gives a basic and illustrative presentation of the relevant topics without using many technical derivations. On the other hand many of the procedures are presented at a technically advanced level: for a thorough understanding, they are to be proven. In order to meet both requirements jointly, the present book is equipped with a lot of challenging problems at the end of each chapter as well as with the corresponding detailed solutions. Thus the virtual text – augmented with more than 60 basic examples and 40 illustrative figures – is rather easy to read while a part of the technical arguments is transferred to the exercise problems and their solutions.

NATIONAL BOOK AWARD FINALIST • STONEMALL BOOK AWARD WINNER • ONE OF TIME MAGAZINE'S 100 BEST YA BOOKS OF ALL TIME NAMED ONE OF THE BEST BOOKS OF THE YEAR by The New York Times • Time • Buzzfeed • NPR • New York Public Library • Publishers Weekly • School Library Journal A genre-defying novel from the award-winning author NPR describes as “like [Madeline] L'Engle-glorious.” A singular book that explores themes of identity and justice. Pet is here to hunt a monster. Are you brave enough to look? There are no monsters anymore, or so the children in the city of Lucille are taught. Jam and her best friend, Redemption, have grown up with this lesson all their life. But when Jam meets Pet, a creature made of horns and colors and claws, who emerges from one of her mother's paintings and a drop of Jam's blood, she must reconsider what she's been told. Pet has come to hunt a monster, and the shadow of something grim lurks in Redemption's house. Jam must fight not only to protect her best friend, but also to uncover the truth, and the answer to the question--How do you save the world from monsters if no one will admit they exist? A riveting and timely young adult debut novel that asks difficult questions about what choices you can make when the society around you is in denial. "[A] beautiful, genre-expanding debut" -The New York Times "The word hype was invented to describe books like this." -Refinery29

Since ancient times, stories have abounded concerning the existence of ghost animals. From the Native American animal spirits, to the menacing demon dogs of medieval England, to present day encounters with animal apparitions, there can be little doubt that animals, like people, live after death and pass back and forth between this world and the next. In the realm of the paranormal, experiences concerning deceased pets who revisit the living are common events. Like the ghosts of humans, pet ghosts return for various reasons. Sometimes they appear to say goodbye. Sometimes they want to reassure their grieving owners that they are all right, and that their spirits are always with them. And sometimes, as they often did in life, they are guarding their beloved humans, delivering a message or a warning. "Haunted Pets" covers a wide range of encounters with animal ghosts. Some of these encounters are comforting; others are terrifying. In general, when pets return in ghostly form, they provide comfort and protection to the living. But there are other less benign phantom creatures who have been known to haunt places of violence, or exact revenge upon humans for evil deeds which, while long past, have somehow evaded justice.

This book constitutes the refereed proceedings of the 10th International Conference on Database Theory, ICDT 2005, held in Edinburgh, UK in January 2005. The 24 revised full papers presented together with 3 invited articles were carefully reviewed and selected from 84 submissions. The papers are organized in topical sections on query languages and types, multi-dimensional data processing, algorithmic aspects, privacy and security, logic and databases, query rewriting, and query processing and data streams.

Cats and dogs seem to always have a paw planted firmly in our hearts. Capture the life in their eyes and the texture of their fur with a unique embroidered pet portrait! Insta-famous artist Michelle Staub puts a modern spin on thread painting with her easy-to-learn approach. Get started with 4 basic embroidery stitches, and follow the detailed tutorials to hone your skills. Capture awe-inspiring details of your pet with lessons in full-color thread painting or go clean with a simple line drawing—the choice is yours. Learn to personalize your art piece with names, dates, and decorative accents. With 20 sample patterns to customize, you can easily recreate any breed!

Great heavens! This frog really is crazy! This time he claims heâ€™s a secret agent and that thereâ€™s a spy in his pizza. Will the world ever be the same again? Approximately 3,000 words, 10 images, and 1 big spanking. Descriptions of my other popular children's books are included after the main feature (an additional 5 pages).
