WHAT IS THE CASH BASIS METHOD OF ACCOUNTING, AND WHY USE IT? There are really only two reasons businesses keep books: 1) They want information to help them manage their business. 2) They need information for tax filing purposes. Most of America's smaller businesses file their taxes using the Cash Basis, and many use this method of accounting permanently. Larger businesses, on the other hand, generally use the Accrual Basis. This method provides more detailed information for planning and analysis and is usually better suited for decision making in larger companies. The Cash Basis set of books only records expenses when you pay them and income when you receive it. This is just the opposite of the Accrual Basis of accounting, which strives to record expenses when they are incurred and income when it is earned. QuickBooks promotes the Accrual Basis accounting method and therefore does not provide information on how to record your books on the Cash Basis. Either way is acceptable
