Hi there! It's nice to present you once again with another "hot" issue of easyuni. On 11 June this year, we launched the unifrens social platform, an extension to easyuni's existing vision of providing comprehensive and accurate information to students about colleges and universities. This is another milestone in the history of easyuni as one of Asia's most popular education portals, committed to helping students with their higher education plans. unifrens is a social platform which allows students, searching for universities and colleges with similar interests, to connect with each other to help them make unbiased and community-driven decisions about their higher education. It also allows them to connect with students who are currently enrolled at universities who can tell them about their experiences about a particular city, country, university or a course. unifrens is something we had been planning for a while to complement our current family of tools for students. We always knew that our users would love it as they want more community-driven information instead of promotional content from universities and "study abroad" consultants. I believe this feature will democratise the way information about specific courses, countries or institutions is presented and this can only mean good news for students and their parents visitors, as it helps them make more informed decisions about which course, institution or country to pick. Students can also pose questions to their groups, which will be answered by experts and the community. The feature is still in its beta stage but has gained massive traction with over 100,000 users already registered and assigned to groups. Exciting, isn't it? The issue you're holding now has so much to offer as well. So, read every page and fill yourself with all the knowledge needed to make informed decisions about your higher education.

Laptops, smart phones, and tablet PCs have made today's business owner more mobile than ever, but life on the go also makes it more difficult to stay organized, be productive, and focus on promoting one's business. 30 Days to Virtual Productivity Success is the busy business owner's guide for getting more done with less time, making productive contacts online, and using the power of the Internet to turn productivity into profits. It's an easy-to-read, quick-to-implement resource to maximize time and effort. Author Gail Z. Martin has a 26-year marketing career with extensive experience in virtual and traditional promotion. Her unrelenting travel schedule has made her a whiz at managing her personal and professional life with online productivity tools. An Android smartphone or tablet makes it possible for you to stay online and do your offices and business work wherever you are going. With Android, you can do almost any computing task you can imagine. There are more than 400,000 Android applications (apps) to choose from. The majority of the apps are games and leisure programs. However, today there are also apps for practically any type of office work and business tasks that you can imagine. Many office tasks, which until recently could only be performed using a powerful PC or laptop, can today easily be done using an Android tablet or smartphone. There are several excellent Android apps for word processing and spreadsheet calculations so that these and many other types of office work easily can be done on handheld Android device. This has led to a new way of working, which is often called mobile computing. There are many excellent brands of Android tablets and smartphones on the market. Samsung is today seen as the leading manufacturer of Android smartphones and tablets. In 2010, Samsung launched the Galaxy Tab 7.1 tablet. The Galaxy Tab 7.1 quickly became highly popular and a benchmark for other Android tablets. Later, more powerful and larger Galaxy tabs have been marketed, including the Galaxy Tab 7.7, 8.9, and 10.1. This book focuses on the Galaxy Tab 7.1. You will benefit most from the book if you have a Samsung Galaxy Tab 7.1. If you own another tablet or smartphone running on Android 2.2 (Froyo) or 2.3 (Gingerbread), you will also benefit from reading the book, as the different brands of Android 2.2./2.3 tablets and smartphones work much in the same way. The Samsung Galaxy Tab 7.1 tablet is ideal for Android mobile office computing due to its excellent communication capabilities and size. It has highly effective and versatile built-in chipsets and tools for mobile (cellular) data communication, Wi-Fi network connections, and Bluetooth communication. In addition, its GPS antenna and tools make accurate location determination and navigation possible. It fits easily into any briefcase - and even into a large pocket, making it very easy carry around. The main challenge of mobile computing is possibly to get online in different situations - in a way that is inexpensive, secure, and effective. While both mobile (cellular) broadband and public Wi-Fi networks are rapidly being expanded and improved, it may still now and then be difficult or expensive to connect, when you are outside your carrier's coverage. If you can find a fast and inexpensive connection, it may not be secure. In this book, you get the needed technical background to make it easier for you to get online in an affordable and secure way, wherever you are. You get detailed information about mobile computing using mobile broadband (cellular) networks and Wi-Fi connections. You are introduced to the mobile connection standards 2G, 3G, and 4G. You learn how to set up your Galaxy Tab for different types of mobile communication in your home country and abroad. You get detailed instructions on how to use email apps effectively on your Android smartphone and tablet. Last, you are introduced to some of the most popular and valuable Android apps for office work and other business tasks. The Samsung Galaxy Tab 7.1 exists in two different models as regards mobile communication: a CDMA/EVDO model, primarily intended for the US market; and a GSM/UMTS model, primarily intended for the non-US market. The book describes both major models.
