During his college years, the very family solidarity that allowed Francisco to survive as a child is tested. Not only must he leave his family behind when he goes to Santa Clara University, but while Francisco is there, his father abandons the family and returns to Mexico. This is the story of how Francisco coped with poverty, with his guilt over leaving his family financially strapped, with his self-doubt about succeeding academically, and with separation. Once again his telling is honest, true, and inspiring. A Smithsonian Magazine Best Book of the Year — Rooted in the past, Jiménez's story is also about the continuing struggle to make it in America, not only for immigrant kids but also for those in poor families. Never melodramatic or self-important, the spare episodes will draw readers

In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called

determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States.
