Reborn's chief teaching method is the "Dying Will Bullet" (死ぬ気弾, Shinukidan), which causes a person to be "reborn" with a stronger self to execute his dying wish. The clumsy, underachieving Tsuna becomes stronger, more confident and willing, making him a suitable Vongola family boss despite his continued reluctance.

"Beyond the battles themselves, Glantz also presents an in-depth portrait of the Red Army as an evolving military institution. Assessing more clearly than ever before the army's size, strength, and force structure, he provides keen insights into its doctrine, strategy, tactics, weaponry, training, officer corps, and political leadership. In the process, he puts a human face on the Red Army's commanders and soldiers, including women and those who served in units - security (NKVD), engineer, railroad, auto-transport, construction, and penal forces - that have till now remained poorly understood."--BOOK JACKET.

Champion of Light. Winter has stopped the war—almost—yet men are dying, calling out for the Dragon. But where is he? Rand al'Thor has been proclaimed the Dragon Reborn. Traveling to the great fortress known as the Stone of Tear, he plans to find the sword Callandor, which can only be wielded by the Champion of Light, and discover if he truly is destined to battle The Dark One. Following Rand, Moiraine and their friends battle Darkhounds on the hunt, hoping they reach the Heart of the Stone in time for the next great test awaiting the Dragon Reborn. Since its debut in 1990, *The Wheel of Time*® by Robert Jordan has captivated millions of readers around the globe with its scope, originality, and compelling characters. The last six books in series were all instant #1 New York Times bestsellers, and *The Eye of the World* was named one of America's best-loved novels by PBS's *The Great American Read*.

Asia Reborn unveils the story of Asia's resurgence over the past century. In the first single chronicle of the modern economic and political history of the whole continent, Prasenjit K. Basu weaves together a compelling account of how Asia's nations overcame European domination in the twentieth century-and its legacies of war and famine-to begin the long climb to economic dynamism. Asia Reborn shows British, Dutch and French colonies to have had

scant infrastructure or modern industry and to have consequently been far behind Taiwan, Manchuria and Korea in social indicators such as literacy and life expectancy by mid-century. In West Asia and Burma, the brief European imprint created the ethnic conflicts that still plague these regions. The British Indian Army held the edifice of empire together. Ultimately, it was the undermining of its legitimacy by the armies of Subhas Bose, Sukarno, Ho Chi Minh and Aung San that helped end the ravaging of Asia during the first half of the twentieth century. By the end of the century, the eastern part of the liberated continent, had emulated Japan and Singapore in transforming itself into an industrious, dynamic and increasingly creative force finally capable of taking its people to new heights in an Asian twenty-first century.

Airpower Reborn offers a conceptual approach to warfare that emphasizes airpower's unique capability to achieve strategic effects. Six world-leading theorists argue that a viable strategy must transcend the purely military sphere, view the adversary as a multi-dimensional system, and pursue systemic paralysis and strategic effects rather than military destruction or attrition. The book is divided into three parts. The first section presents a historical perspective on airpower theory and airpower strategy, tracing their evolution from the 1920s to the 1980s. The second section contains in-depth examinations of the strategic concepts that John R. Boyd and John A. Warden developed in the 1980s and 1990s, with an emphasis on their contemporary relevance. The final section provides further context on modern airpower theory and strategy. Theory, in this setting, serves as the basic paradigm, strategy

represents its generic, mechanisms-centered application, and plans of campaign constitute the specific steps for any given situation. In short, the authors look beyond the land-centric, battlefield-oriented paradigm that has continued to dominate military theories and strategies long after airpower offered new options. The book acknowledges the essential role of advanced technology in improving airpower capabilities, but emphasizes that air services must cultivate and harness the intellectual acumen of airmen and encourage officers and men to think conceptually and strategically about the application of aerospace power. Modern airpower can offer political decision-makers more and better options--provided the underlying strategy coherently links the application of airpower directly to the end-state objectives rather than limiting it to "the battle." The book recommends that all countries should consider

establishing a dynamic and vibrant environment for mastering aerospace history, theory, strategy, and doctrine; a milieu for cultivating broader knowledge of and insight into airpower; and a setting in which airpower experts have the opportunity to communicate their narrative to politicians, the media, and fellow officers, and to interact to mutual benefit with experts from all sectors of governance. This effort should emphasize the potentially unique contribution of airpower to political objectives and joint operations, and in turn connect to operational headquarters that do operational planning. Mastering such strategic thought lies at the heart of the military profession, but it requires in-depth knowledge and understanding of theory, strategy, and airpower, and transcends traditional metrics.
