~~Premier Paper—Recycled~~

Manufacturing recycled paper uses less energy, water, and produces lower carbon emissions, than manufacturing non-recycled paper. It also significantly reduces the amount of waste sent to landfill. Yet, with advances to our sustainable production processes, our papers are now as white and offer the same print performance as virgin fibre products.

~~Recycled Papers~~

Most studies indicate that energy savings of 7 to 57 percent are possible for paper products such as newsprint, printing paper, packaging paper, and tissue paper. On the other hand, paperboard products require more energy (40 to 150 percent more) when manufactured from recycled material (Office of Technology Assessment [OTA], 1989).

~~Recycled Paper—an overview | ScienceDirect Topics~~

There are numerous materials that can be recycled, including plastic bottles, plastic containers, newspapers, magazines, aluminum cans, tin cans, corrugated cardboard, cereal boxes, tissue boxes, metal hangers, paper towel/toilet paper rolls, junk mail, and more. What are the most eco-friendly materials?

~~19 Amazing Products Made from Recycled Materials ...~~

These recycled products have been made from items salvaged before reaching landfill. Recycled glass, fabrics and paper have all been transformed by skilled tradespeople into eco-friendly and guilt-free presents. Tyres, fire hoses, vinyl records and even circuit boards have been upcycled by creative designers who care about the environment.

~~Recycled & Upcycled Presents | Eco Gifts~~

Recycling one tonne of paper would power a home for nine months, save 7,000 gallons of water and reduce greenhouse gas emissions by one metric tonne of carbon equivalent (CO₂e). We also "get it"...

~~Is it better to use recycled paper or FSC-certified paper ...~~

Made from pulp containing between 50% and 100% recovered fibre (depending on brand) the recycled printer and copy paper range from Purelypaper covers basic copier grades through to premium business grades in A4 and A3, as well as design and commercial print grades in SRA3 and larger folio sizes such as SRA2.

toilet paper and tissues, paper towels and napkins, greeting cards, cardboard, and magazine and newspapers. Creative retailers are also selling other items that have not traditionally been made from recycled paper.

~~How Is Paper Recycled: Step by Step | Greentumble~~

The recycling of paper is the process by which waste paper is turned into new paper products. It has a number of important benefits: It saves waste paper from occupying homes of people and producing methane as it breaks down. Because paper fibre contains carbon, recycling keeps the carbon locked up for longer and out of the atmosphere. Around two-thirds of all paper products in the US are now recovered and recycled, although it does not all become new paper. After repeated processing the fibres

deinking and cleaning/screening, resulting in the quality of paper made from secondary fibres approaching that of virgin paper. The process is a lot more eco-friendly than the virgin-papermaking process, using less energy and natural resources, produce less solid waste and fewer atmospheric emissions, and helps to preserve natural resources and landfill space. Currently more than half of the paper is produced from recovered papers. Most of them are used to produce brown grades paper and board but for the last two decades, there is a substantial increase in the use of recovered papers to produce, through deinking, white grades such as newsprint, tissue, market pulp. By using recycled paper, companies can take a significant step toward reducing their overall environmental impacts. This study deals with the scientific and technical advances in recycling and deinking including new developments. Covers in great depth all the aspects of recycling technologies Covers the latest science and technology in recycling Provides up-to-date, authoritative information and cites many mills experiences and pertinent research Includes the use of biotech methods for deinking, refining, and improving drainage

"Paper products are used all the time in our society and this means that more trees are being cut down to keep up with demand." read to know more
