Documents the true story of a rogue Soviet submarine's 1968 attempt to provoke a war between the U.S. and China by firing a missile off the coast of Hawaii, in an account that offers insight into the subsequent cover-up and the event's influence on U.S. negotiations with the USSR and China. Reprint.

The rhetoric of social justice is commonplace but increasingly it means little more than a tag line or a punctuation point. Reconstructing Social Justice presents a new framework for social justice that will change the way people think about social justice and change the way people implement social justice. This book carves out an intellectual and practical space for social justice that is distinct from political, legal, and economic spheres. While emphasizing a distinct domain for social justice, the author then makes sense of its healing role in terms of the polity, economy, technology, and religion. Drawing from a rich supply of classroom experiences, her research on mosque controversies after September 11, 2001, and then the global examples of truth and reconciliation commissions, Frederking invites the reader to think about the relevance of social justice from the micro to the macro level. Rather than a set of policy outcomes or ideological positions, social justice is a process of social accountability that demands honest and transparent engagement. While disagreement is likely and controversy inevitable, this social justice process reaffirms our connectedness and moves us forward as a collective.

Religious Education is now identified as a shortage subject as a growing number of pupils in schools opt for it. The growing emphasis on children's moral and spiritual education, the DfEE's hunt for new teachers, OFSTED's calls for improvement and reinforced links with philosophy have pushed the subject into the spotlight. Based on research and partnership with schools this book examines and explains : * the role of Religious Education in the curriculum * the role of spirituality in children's lives * better teaching practice, giving practical examples.

This interdisciplinary collection of critical articles seeks to reassess the concept of hybridity and its relevance to post-colonial theory and literature. The challenging articles written by internationally acclaimed scholars discuss the usefulness of the term in relation to such questions as citizenship, whiteness studies and transnational identity politics. In addition to developing theories of hybridity, the articles in this volume deal with the role of hybridity in a variety of literary and cultural phenomena in geographical settings ranging from the Pacific to native North America. The collection pays particular attention to questions of hybridity, migrancy and diaspora.

It's not all "fun and games." A growing body of research suggeststhat recreation activities can be powerful development contextswhen they are properly framed and intentionally designed. Thisvolume highlights much of that research, and the articles thatfollow provide ample evidence that well-framed recreationactivities and contexts can provide a range of positivedevelopmental outcomes. Editors Lawrence R. Allen and Robert J. Barcelona draw on their own work in human and youth development and have assembledcontributing authors who explore the important of meaningfulrecreation and leisure experiences in the lives of youth and thevalue of recreation from a developmental perspective. Chaptersfocus on the developmental potential of specific recreationcontexts and settings and provide research and evidence-basedstrategies outlining the activities that best promote positiveyouth development. Finally, the volume demonstrates how recreationsis being used to strengthen individual and community assets and itsrole as a contributor in addressing pressing social issues. This is the 130th volume of New Directions for YouthDevelopment, the Jossey-Bass quarterly report seriesdedicated to bringing together everyone concerned with helpingyoung people, including scholars, practitioners, and people fromdifferent disciplines and professions. The result is a uniqueresource presenting thoughtful, multi-faceted approaches to helpingour youth develop into responsible, stable, well-roundedcitizens.

There is a certain poise that comes with understanding the ocean's moods, tapping a pulse borne of a distinct, untamed, unfathomable energy source. An equilibrium, located on a singular track between the sucking trough and the pitching crest. A sense of perfect balance on a rolling, temporary stage, not a single movement wasted. A spray-blinded late takeoff in roaring Santa Ana winds. A confidence, knowing your instincts won't let you down. Thirteen years ago J. Shepard's mother rose before dawn, packed a bag and walked out of his life forever. Since then, the rolling surf has been his only escape, a refuge from the daily stress of his job defending parents in the overburdened L.A. juvenile dependency court, and from the dark, unanswered questions of his past. When J. is assigned a high profile case, one in which a mother is accused of selling her child to the highest bidder, even a day in the surf won't let him escape. J. can't hide from the media attention that the case draws, and nor can he hide from the painful memories of his own desertion that the case congers. He realizes that if he does not confront the mystery of his own past he will always be stuck in equilibrium, unable to move against his emotional and physical tide. He will be stuck in the darkest spot in the ocean, the reef dance. J. simultaneously throws himself into the case and search for the reasons behind his own mother's disappearance. In order to succeed in both areas, however, he must rely on an old friend, Jackie Pace, a wayward surfing legend with a sordid past, that no one believes is reliable. But J. needs his friends help, and Jackie must rise to the challenge not just because he is J.'s friend but because he is much more intimately linked to the mystery than J. could ever know. Reef Dance will suck you into the surfer's pacific, pulling you deep within it's mystery, and the turmoil of one man's soul.

Since the 1950s there has been a persistent shortage of sci-tech librarians, and as more librarians retire or change positions, the prospect looms that the profession will only depopulate further. Tackling this difficult challenge, Recruiting, Training, and Retention of Science and Technology Librarians gathers together into one source the perspectives of top library administrators and managers as well as front-line librarians who present the latest research and practical strategies to find, train, and keep those valuable specialized professionals. This book explores in depth timely issues and presents creative perspectives and innovative solutions to this persistent problem in subject-specialized libraries. As the baby-boom generation of science and technology librarians begins to retire, training and keeping sci-tech librarians will become even more crucial. Recruiting, Training, and Retention of Science and Technology Librarians discusses the [replacement gap] problem in libraries, including who should be recruited, and how to retain them once hired. Several authors address the field's long-standing specialist vs. generalist debate, bringing new data and experience-driven perspectives to this challenging issue. Topics in Recruiting, Training, and Retention of Science and Technology Librarians include: updating the cultural image of librarians to make the profession more appealing a comprehensive literature review how to cultivate candidates who are dedicated to service and love research and learning practical approaches to improve the visibility and attractiveness of science librarianship the skills and support needed to become a successful science librarian an innovative program to recruit undergraduates an in-depth survey of practicing science and technology librarians the challenges of science librarianship in Africa library and information science educators as recruiters for sci-tech librarians creative strategies to recruit and retain librarians adapting aspects of first-year student retention programs as a model for library retention programs how professional competencies can be used for recruitment, training, and retention and more Recruiting, Training, and Retention of Science and Technology Librarians is a timely, important resource for college and university administrators, and public, special, academic, and government librarians.

This major book offers a comprehensive overview of key debates on subjectivity and the subject in psychological theory and practice. In addition to social construction's long engagement with social relations, this volume addresses questions of the body, technology, intersubjectivity, writing and investigative practices. The internationally renowned contributors explore the tensions and opposing viewpoints raised by these issues, and show how analyzing the psychological subject interrelates with reforming the practices of psychology. Drawing on perspectives that include feminism, dialogics, poststructuralism, hermeneutics, Lacanian psychoanalysis, and cultural or social studies of science, readers are guided through pivotal
