Huxley writes, in his foreword to Brave New World (1946), that “The theme of Brave New World is not the advancement of science as such; it is the advancement of science as it effects human individuals.The triumphs of physics, chemistry and engineering are tacitly taken for granted.

*Brave New World Research Paper #2 | FreebookSummary*

Aldous Huxley’s Brave New World represents the most perfect social system with minimum deviation probability. The system itself is based on consumerism which reduces any human activity to consumption of various material goods which leads to full satisfaction of society’s needs. Science is considered to be the fundamental power controlling this system as it has reached significant progress by the beginning of the narration.

Introduction. “Aldous Huxley's tour de force, Brave New World is a darkly satiric vision of a “utopian” future – where humans are genetically bred and pharmaceutically anesthetized to passively serve a ruling order. A powerful work of speculative fiction that has enthralled and terrified readers for generations, it remains remarkably relevant to this day as both a warning to be heeded as we head into tomorrow and as thought-provoking, satisfying entertainment.”.

Seminar paper from the year 2005 in the subject English - Literature, Works, grade: none, Carl von Ossietzky University of Oldenburg (English Department), course: Literary Utopias and Dystopias, 5 entries in the bibliography, language: English, abstract: This paper is about the major themes of Huxley ´s novel "Brave New World" and about how much of these themes have (in part) become reality today. The paper takes a closer look on genetic engineering, the misuse of psychological conditioning, promiscuity to achieve happiness and the destruction of the institution "family" and examines each theme ´s relevance for our society today.

Seminar paper from the year 2010 in the subject Literature - Basics, grade: 2,0, Catholic University Eichstätt-Ingolstadt (Sprach-und Literaturwissenschaften), language: English, abstract: Contents 1. Introduction .....03 2. The various forms of conditioning in Brave New World .....04 2. 1 Biological engineering .....04 2. 2 The use of psychological conditioning .....05 2. 2. 1 Behaviourism .....05 2. 2. 2 Sleep-teaching and hypnopaedia .....06 2. 3 Chemical persuasion.....08 3. The essential role of conditioning in the “utopian” world .....10 4. Conclusion .....12 Bibliography .....14 1. Introduction Unquestionably, Aldous Huxley’s Brave New World, written in 1931, is one of the most fascinating dystopian novels. His description of a world state in the future, in which people are conditioned and manipulated from the cradle to the grave is meant to be a warning of the danger of dehumanization. Huxley draws a picture of a future including the misuse of political power, economic control, sciences and technology, biological engineering, mass consumption and the loss of ethical values. More precisely, Huxley’s Brave New World could be regarded as a kind of “leisure dystopia” which is defined as an “utopia [that has] gone wretched or failed paradise-engineering projects.” The fine line between utopia and dystopia becomes visible. In leisure dystopian societies like in Brave New World, all problems have officially been abolished and the people are living in wealth and happiness. But this state is only achieved by eliminating intellectualism, values or individual freedom. Therefore, the state rulers need means of control. One of the most powerful tools is conditioning in various forms. This study is meant to focus on the three types of conditioning prevailing in Brave New World. According to the order in the novel, the biological engineering in the pre-natal status will be discussed at first. Thereafter, the use of psychological conditioning with the methods of behaviourism, sleep-teaching and hypnopaedia is an essential theme. To complete it, the last type of conditioning, the chemical manipulation will be looked at. The different aspects will be combined with the motto of the World State in Brave New World: “Community, Identity, Stability” . Furthermore the loss of individuality caused by biological and psychological conditioning is an important component within the analysis. After this closer examination...

Pre-University Paper from the year 2013 in the subject English Language and Literature Studies - Literature, grade: 14, , language: English, abstract: This scientific research paper evaluates the importance of freedom and individuality by reference to Aldous Huxley’s novel “Brave New World” (1932). I chose this topic, because of its high complexity and the fact that technological progress plays a continuously rising role in our daily routine to make our lives easier or more comfortable. By writing about the inhumane circumstances, the inhabitants of the Brave New World live in, without realizing their loss of individuality or freedom; I want to point out that technological progress should always be only a human’s tool instead of his suppressor. The topic itself is very topical, because there are numerous controversies concerning technology, especially in the field of agricultural genetic engineering or, even more controversial, the use of technology in relation to human beings such as cloning and stem cell research. The novel contains a great deal of hidden messages and allusions, which is the reason why I would like to analyse the novel profoundly and convince the reader of the following pages of my hypothesis that humanity is more crucial for progress than technology. This research paper was a challenge, since it has been the first scientific work I have written and the fact that I have chosen a complex and demanding topic. Aldous Huxley’s dystopian science-fiction novel “Brave New World”, which was published in 1932 in London, covers the issue of a dehumanized society, in which individuality, freedom and contiguous, for us self-evident morals are taken in exchange for “Community, Identity [and], Stability". It takes place in the future, in the year A.F. (Annum Ford) 632, which equals the year 2540 in our calendar.

The astonishing novel Brave New World, originally published in 1932, presents Aldous Huxley's vision of the future -- of a world utterly transformed. Through the most efficient scientific and psychological engineering, people are genetically designed to be passive and therefore consistently useful to the ruling class. This powerful work of speculative fiction sheds a blazing critical light on the present and is considered to be Aldous Huxley's most enduring masterpiece. The nonfiction work Brave New World Revisited, first published in 1958, is a fascinating work in which Huxley uses his tremendous knowledge of human relations to compare the modern-day world with his prophetic fantasy envisioned in Brave New World, including the threats to humanity, such as overpopulation, propaganda, and chemical persuasion.

Wandering into Brave New World explores the historical contexts and contemporary sources of Aldous Huxley's 1932 novel which, seventy years after its initial publication remains the best known and most discussed dystopian work of the twentieth century. This new study addresses a number of questions which still remain open. Did his round-the-world trip in 1925-1926 provide material for the novel? Did India's caste system contribute to the novel's human levels? Is there an overarching pattern to the names of the novel/s characters? Has the role of Hollywood in the novel been underestimated? Is Lenina Crown a representative 1920s "flapper"? Did Huxley have knowledge of and sources for his Indian reservation characters and scenes quite independent of and more accurate than those of D. H. Lawrence's writings? Did Huxley's visit to Borneo contribute anything to the novel? New research allows substantive answers and even explains why Huxley linked such figures as Henry Ford and Sigmund Freud. It also shows how the novel overcomes its intense grounding in 1920s political turmoil to escape into the timelessness of dystopian fiction.

Brave New Brain is a travel guide to the future. Scientists are presently mapping both the terrain of the brain and the geography of the genome. Psychiatry has joined them on a quest to conquer mental illnesses - those illnesses that strike the most human part of our bodies, our brains and minds. Brave New Brain is designed as a resource book for following this voyage of discovery. It explains the nature of mental illness and genome and brainmapping. using clear simple language, interesting case histories, and extensive illustrations. Scientists today know more about the brain than ever before. Andreasen gives us an engaging and readable description of how it all works, from the billions of neurons to the tiny thalamus to the moral monitor in our prefrontalcortex. She also shows the progress made in mapping the human genome, whose 30,000-40,000 genes are almost all active in the brain.

This books is aimed at publishers, librarians, printers, communications professionals and anyone who has an interest in the past, present and future of the book. It chronicles the early beginnings of printing technology and book publishing in the context of the book as a major cultural agent. The book discusses the print medium in light of challenges from non-paper communications technologies and how the book publishing industry can face these challenges in order to remain an important player in the extant multi-media market place by exploiting the technical and creative possibilities afforded by newer digital printing technologies. Written by a highly knowledgeable and well respected academic and practitioner in the print media field Provides detailed technical information on conventional and digital reproduction technology Technology is discussed in the context of the cultural evolution of communication
