For one leading pharmaceutical laboratory, success and double-digit sales growth came with a cost: an overburdened supply chain that threatened to reduce market share. The effort vastly improved the company's planning and execution functions, they knew that in order to ...

This publication highlights key transport issues in the Pacific developing member countries of the Asian Development Bank (ADB) and sets out ADB's planned 2021–2025 transport sector operations in the region. These operations, based on domestic and regional sector priorities and ADB's Strategy 2030, aim to help countries prepare for and respond to shocks, deliver sustainable services, and promote inclusive growth. The publication covers maritime, land, and urban transport; aviation; and intermodal connectivity. It discusses climate change adaptation and disaster risk management, regional cooperation and integration, institutional capacity, gender equality, land ownership, and procurement. It is linked to ADB's Pacific Approach strategy document.

This report analyses planned infrastructure projects, decision-making frameworks related to infrastructure development and strategic planning documents in eight countries in Central Asia and the Caucasus: Azerbaijan, Georgia, Kazakhstan, the Kyrgyz Republic, Mongolia, Tajikistan, Turkmenistan and Uzbekistan.

This report analyses planned infrastructure projects, decision-making frameworks related to infrastructure development and strategic planning documents in the six countries of the EU Eastern Partnership: Armenia, Azerbaijan, Belarus, Georgia, Moldova and Ukraine.

This report provides information about the role of transportation in supporting welfare-to-work initiatives and identifies practical strategies to improve

Download Ebook Road Map For Developing Transport In Sri Lanka

access to job opportunities for former welfare recipients making the transition to work. The Guidebook describes service approaches that include modifications to existing mass transit services, coordination between transportation services, ridesharing programs, automobile ownership programs, and collaborations between faith-based and community-based groups.

Originally published in 1916, this book forms part of a two-volume set on the history of transportation in modern England, taking the term 'modern' as meaning 'the period beginning with about the close of the fifteenth century and ending with approximately the middle of the nineteenth century'. Volume one covers the period from 1500 up until the introduction of steam and volume two focuses on the development of railways and the effect of this change on other modes of transportation. Both books contain detailed textual notes and a comprehensive bibliography is also included. The set will be of value to anyone with an interest in transportation and British history.

This book provides several up-to-date empirical policy-oriented studies on assessing the impacts of climate change on various economic sectors and the role of renewable energy resources in mitigating pollution and climate change. It suggests various policy recommendations on how to increase the share of renewable energy resources in the energy baskets of the members of the Association of Southeast Asian Nations (ASEAN) and the rest of the world to ensure energy sustainability. As of 2020, most of the world's energy investment still went to carbon-emitting sources, namely, fossil fuels. On the other hand, the Covid-19 pandemic and the economic Project Overview 20 March 2021 08:39 Page 6 of 9 downturns shrank the global energy demand, including fossil fuels, resulting in a sharp drop in their prices. Low fossil fuel prices are harmful to developing renewable energy projects, making solar, wind, and other renewable energy resources less competitive as sources of electricity. This is endangering the Paris agreement and the "Climate Action" goal of the United Nations. Given the high share of fossil fuels in the energy mix of the members of ASEAN, tremendous challenges must be faced for their energy transition in the post-Covid-19 world. The authors call for sound policy and applicable technologies to ensure sustainable energy availability, accessibility, and affordability to reach emission reduction targets.
