This book provides an overview of the basic concepts of a systems theoretical perspective using families and family therapy as examples and illustrations of their

Where To Download

Application in
professional
practice. This
meta-perspective
focuses on
viewing problems
in context. The
difference
between first-
order and second-
order
cybernetics is
explicated.
Readers then are

Where To Download

invited to see
themselves as
parts of the
systems with
which they are
working
consistent with
a second-order
cybernetics
perspective.
Along the way a
difference
between
modernism and

Where To Download

post-modernism
as well as
constructionism
and social
constructionism
also are
described. In
addition,
theories of
individual and
family
development are
presented with
implications for

Where To Download

their use in
family therapy.
The book
concludes with
more than 100
examples of how
the meta-
perspective of
systems theory
can be used in
work with
families.
