The International Management Accounting Conference 4 was held in August 2007 in Kuala Lumpur to discuss issues pertaining to the role of accounting in liberalized economy. From the conference, it was clear that liberalised economy does impact the direction, nature and practices of accounting. In response to these challenges, accounting must play a proactive and relevant role to sustain the competitiveness of companies in the business environment. Therefore it is the intention of the conference organizers to share the issues, problems and challenges in sustaining competitiveness in liberalized economy with a larger audience through the publication of this book. The book is organized in the following themes: ? Cost and Information Management ? Performance Measurement ? Strategic Alliance The articles included in this book were selected from the papers reviewed and presented at the International Management Accounting Conference 4. The articles were written based on research findings of studies conducted in several countries including Malaysia, New Zealand, Indonesia, UK, India, Saudi Arabia and Botswana. Therefore they are expected to have high academic value, each complete with literature review, methodology, data analysis and references. Even though that is the case, the papers have been carefully chosen and edited for mass readers. This book is suitable for researchers, academicians, graduate students, and practitioners with interest in business, economics and accounting:

To date, there has been little consideration of the many different ways in which accounting and risk intersect, despite organisations being more determined than ever to build resilience against potential risks. This comprehensive volume overcomes this gap by providing an overview of the field, drawing together current knowledge of risk in a wide range of different accounting contexts. Key themes such as corporate governance, trust, uncertainty and climate change are covered by a global array of contributing scholars. These contributions are divided into four areas: The broader aspects of risk and risk management Risk in financial reporting Risk in management accounting Risk monitoring The book is supported by a series of illustrative case studies which help to bring together theory and practice. With its wealth of examples and analyses, this volume provides essential reading for students, scholars and practitioners charged with understanding diverse facets of risk in the context of accounting in the business world.

The Journal of Global Business and Management Research (GBMR) strives to comply with highest research standards and scientific/research/practice journals' qualities. Being international and inter-disciplinary in scope, GBMR seeks to provide a platform for debate among diverse academic and practitioner communities who address a broad area of business and management issues across the globe.

"This book concentrates on strategies that exploit emerging technologies for the knowledge effectiveness in social networks"---Provided by publisher.

This book constitutes the refereed proceedings of the 5th International Conference on User Science and Engineering, i-USER 2018, held in Puchong, Malaysia, in August 2018. The 32 papers accepted for i-USER 2018 were selected from 72 submissions with a thorough double-blind review process. The selected papers illustrate how HCI is inclusive and omnipresent within the domains of informatics, Internet of Things, Quality of Life, and others. They are organized in the following topical sections: design, UX and usability; HCI and underserved; technology and adoption; human centered computing; HCI and IT infrastructure; and HCI and analytics.

This book presents for the first time an interdisciplinary view ofproperty development and property developers. Fourteen contributorare brought together here from leading researchers and respectedpractitioners, including property analysts, economists,geographers, planners and sociologists. This rounded picture ofproperty research explores: * the development of quantitative and qualitative researchmethods * theories ranging from mainstream economics to socialconstructivism * the inter-relationships between the economic and the social,and between individuals and organisations and theirenvironments Development and Developers highlights the benefits ofdifferent research approaches and methods, demonstrating how a moreinclusive, multidisciplinary view of property research will connectto wider debates in urban studies.

In this book, Cees J Hamelink proposes an answer to - how should democratic societies organize cyberspace? - that puts human-rights, rather than profit, at the top of the agenda. He argues that conventional ethical approaches are all seriously flawed. There is a growing volume of moral rules, netiquettes and codes of conduct, but they are of little help in solving the moral dilemmas raised by the new technologies. In this book the author analyzes the inadeqacies of current global governance policies and structures that underpin them, and argues for standards which put justice, human security and freedom first.

The SAGE Handbook of Nations and Nationalism gives readers a critical survey of the latest theories and debates. Its three sections guide the reader through the theoretical approaches to this field of study, its major themes - from modernity to memory, migration and genocide - and the diversity of nationalisms found around the globe.
