The story of global sport is the story of expansion from local development to globalized industry, from recreational to marketized activity. Alongside that, each sport has its own distinctive history, sub-cultures, practices and structures. This ambitious new volume offers state-of-the-art overviews of the development of every major sport or classification of sport, examining their history, socio-cultural significance, political economy and international reach, and suggesting directions for future research. Expert authors from around the world provide varied perspectives on the globalization of sport, highlighting diverse and often underrepresented voices. By putting sport itself in the foreground, this book represents the perfect companion to any social scientific course in sport studies, and the perfect jumping-off point for further study or research. The Routledge Handbook of Global Sport is an essential reference for students and scholars of sport history, sport and society, the sociology of sport, sport development, sport and globalization, sports geography, international sports organizations, sports cultures, the governance of sport, sport studies, sport coaching or sport management.

This book contains selected papers that address a variety of topics related to the design, development and operation of unmanned and fully autonomous sailing boats. These papers were presented in the 9th International Robotic Sailing Conference, in association with the 9th World Robotic Sailing Championship that took place in Viana do Castelo, Portugal from the 5th to 10th of September 2016. The book is divided in three parts, each focusing on key aspects of robotic sailing. The first part addresses the design, construction and validation of autonomous sailboat platforms, including their rigs, appendages and control mechanisms. The second part is devoted to the development of sensors and algorithms to enhance the performance of robotic sailing boats, in terms of their speed, course control and manoeuvring ability. Finally, the papers in the last part are dedicated to the improvement of behaviours required for the accomplishment of complex autonomous missions. Robotic sailing is a

relatively new multidisciplinary area of research, with a recognized great potential for persistent ocean observation. Using the wind for boat propulsion is something mankind has been doing for centuries. Automating and optimizing the sailing process in the harsh marine environment is an ever present challenge which is now promising to bear fruit.

Landlubbers joke that sailors are always wanting to head off to the ends of the earth, but Chris Santella takes that life-changing desire very seriously. In this, the third installment in his immensely successful "Fifty Places" series, Santella assembles a crew of the world's greatest championship racers and professional adventurers and persuades them to disclose their favorite destinations around the globe. Interviewees include some of the best-known men and women in the sport: Tom Whidden and Gary Jobson (members of the winning 1987 America's Cup crew), Jeff Johnstone (of J-Boats), award-winning sailing writer Lin Pardy, and many others. The amazingly diverse places they've selected range from clubby East Coast ports (Marblehead, Annapolis), to idyllic tropical refuges (Ilha Grande, Brazil; the Polynesian atoll of Mopelia), to some of the most hair-raisingly treacherous waters on earth (Cape Horn). Coastlines around the world—even Antarctica and the Arctic—are represented, and the chosen spots include some spectacular inland waters, such as the Brasão Lakes and the North Channel of Lake Huron. For each of the 50 places, the sailor recommending the venue spins an entertaining yarn about his or her experience there, and each description is accompanied by a make you want to go there now photograph.

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name.

Performance of Sailing Yachts'' betreft een serie boeken over de wetenschap van het zeilen en het ontwerp en het gedrag van zeilende vaartuigen. Het eerste deel met als aparte titel '' The Attainable Speed Under Sail'' behandelt, naast veel basiskennis, de snelheid van diverse typen zeilende vaartuigen (voornamelijk kleine en grote zeiljachten). De basis daarvan is een wiskundig model dat de krachten op de zeilen en op de onderwater romp, kiel en roer in rekening brengt.
