The suggestions in the chapters are primarily provided for the teaching methods course, but many can be adapted to other education courses or for professional development programs. The first section of the introduction provides a review of issues identified in teacher education including debates, accountability, and government influence over education. The second section explores teacher educators in the literature such as issues in their practice, and a focus on foreign language teacher educator practice. The third section provides a brief overview of the chapters in the book.

This book integrates ideas from many theoretical perspectives into a set of principles and concrete strategies that psychology as a whole can offer you. See for Yourself exercises will help you discover more about yourself as a thinker and learner and also help you come to a deeper and more personal understanding of educational psychology's core ideas.
