After two decades of research and development, elliptic curve cryptography now has widespread exposure and acceptance. Industry, banking, and government standards are in place to facilitate extensive deployment of this efficient public-key mechanism. Anchored by a comprehensive treatment of the practical aspects of elliptic curve cryptography (ECC), this guide explains the basic mathematics, describes state-of-the-art implementation methods, and presents standardized protocols for public-key encryption, digital signatures, and key establishment. In addition, the book addresses some issues that arise in software and hardware implementation, as well as side-channel attacks and countermeasures. Readers receive the theoretical fundamentals as an underpinning for a wealth of practical and accessible knowledge about efficient application. Features & Benefits: * Breadth of coverage and unified, integrated approach to elliptic curve cryptosystems * Describes important industry and government protocols, such as the FIPS 186-2 standard from the U.S. National Institute for Standards and Technology * Provides full exposition on techniques for efficiently implementing finite-field and elliptic curve arithmetic * Distills complex mathematics and algorithms for easy understanding * Includes useful literature references, a list of algorithms, and appendices on sample parameters, ECC standards, and software tools This comprehensive, highly focused reference is a useful and indispensable resource for practitioners, professionals, or researchers in computer science, computer engineering, network design, and network data security.

This book gathers the Proceedings of the 6th International Conference on Robot Intelligence Technology and Applications (RITA 2018). Reflecting the conference 's main theme, " Robotics and Machine Intelligence: Building Blocks for Industry 4.0, " it features relevant and current research investigations into various aspects of these building blocks. The areas covered include: Instrumentation and Control, Automation, Autonomous Systems, Biomechatronics and Rehabilitation Engineering, Intelligent Systems, Machine Learning, Robotics, Sensors and Actuators, and Machine Vision, as well as Signal and Image Processing. A valuable asset, the book offers researchers and practitioners a timely overview of the latest advances in robot intelligence technology and its applications.

This textbook will help you learn all the skills you need to pass all Vehicle Electrical and Electronic Systems courses and qualifications. As electrical and electronic systems become increasingly more complex and fundamental to the workings of modern vehicles, understanding these systems is essential for automotive technicians. For students new to the subject, this book will help to develop this knowledge, but will also assist experienced technicians in keeping up with recent technological advances. This new edition includes information on developments in pass-through technology, multiplexing, and engine control systems. In full colour and covering the latest course specifications, this is the guide that no student enrolled on an automotive maintenance and repair course should be without. Designed to make learning easier, this book contains: Photographs, flow charts, quick reference tables, overview descriptions and step-by-step instructions. Case studies to help you put the principles covered into a real-life context. Useful margin features throughout, including definitions, key facts and ' safety first ' considerations.

This book constitutes the refereed proceedings of three workshops held at the 19th International Conference on Financial Cryptography and Data Security, FC 2015, in San Juan, Puerto Rico, in January 2015. The 22 full papers presented were carefully reviewed and selected from 39 submissions. They feature the outcome of the Second Workshop on Bitcoin Research, BITCOIN 2015, the Third Workshop on Encrypted Computing and Applied Homomorphic Cryptography, WAHC 2015, and the First Workshop on Wearable Security and Privacy, Wearable 2015.

This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise, but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

This publication contains important guidance for local authorities that own and operate electronic traffic equipment on their network. This Code of Practice is the first document within the UK which establishes a series of good practice policies and procedures, obtained from experts, on how effectively to manage the maintenance of fixed location electronic traffic control equipment. The growth of technology in the highways sector has led to improvements in congestion control and a reduction in carbon emissions. Adoptions of the recommendations within this code will help local authorities achieve delivery of high quality services.

The ultimate collection of tasteless and sick jokes that just shouldn't be told. More than 3,000 off-colour jokes, covering every taboo from sex and death to race and disability, this book leaves no stone unturned in its search for the most dubious jokes known to humanity. Why exactly do we like to laugh at jokes that are cruel, heartless and downright wrong? And more to the point, who cares so long as they make us laugh? Twice as funny, twice as outrageous, twice as shocking. From Anne Frank's drum kit to the correct use of wheelchairs, this is a fantastic new collection of bad taste and political incorrectness. If you even think about reading it you're a monster; if you buy it you're going straight to hell. Includes gems such as these: My father is in a coma. He's just living the dream. Why don't cannibals eat divorced women? Because they're very bitter. What do you do if a pit bull mounts your leg? Fake an orgasm. How do you stop a politician from drowning? Shoot him before he hits the water. The Beatles have reformed and have brought out a new album. It's mostly drum and bass. I went to see my friend's new baby. They asked me if I wanted to wind him. I thought that was a bit harsh so I just gave him a dead leg instead. Remember, a doggy is not just for Christmas. It's a great position all year round.

Today over 40 million adults and children worldwide are infected with HIV, however knowledge of the disease has increased greatly and the prognosis is now good for those with access to anti-retroviral treatment. For many, HIV is now a long-term chronic condition and with decreased mortality, patient requirements and disease patterns have changed, making it increasingly apparent to health care professionals that the treatment of HIV should include optimum nutrition and healthy lifestyle interventions to help sufferers lead long and healthy lives. In this essential new book an international team of authors under the editorship of Specialist HIV Dietitian Vivian Pribram bring together the latest research to provide the practicing dietitian and nutritionist with a practical guide to the nutritional care of the HIV and AIDS patient. Students and other health care professionals working and studying this area will also find Nutrition and HIV an important and valuable resource.

Why stick with plain old A, B, C when you can have Amelia (Earhart), Malala, Tina (Turner), Ruth (Bader Ginsburg), all the way to eXtraordinary You—and the Zillion of adventures you will go on? Instagram superstar Eva Chen, author of Juno Valentine and the Magical Shoes, is back with an alphabet board book depicting feminist icons in A Is for Awesome: 23 Iconic Women Who Changed the World, featuring spirited illustrations by Derek Desierto.
