productivity software applications. Originally a suite of software called iWork, these apps are roughly the equivalent of Microsoft Office 's Word, Excel, and PowerPoint – but implemented quite differently with Apple 's approach to design and functionality. Written by Apple hardware and software expert, Brad Miser, My Pages®, Numbers®, and Keynote® includes full-color, step-by-step tasks to walk you through these key applications, so you can quickly accomplish exactly what you want through word processing, spreadsheets, and presentations. The tasks include how to: Store your documents on the cloud so you can work with them on any device, including Mac and Windows computers, iPads, and iPhones. Enhance your Pages documents by including tables, charts, photos, tables of content, headers, footers, and more. Use Numbers spreadsheets to organize, format, calculate (using built-in or custom formulas), report, and present information in tables and charts. Use Keynote to build amazing presentations including text, images, charts, animation, and more.
